Abstract: The purpose of this study is to investigate the changes in sea-level along the North Coast of Kuwait Bay. The study area is divided into three sections: the North, the Middle and the South. The sea-level is measured at different points along the coast. The results show that the sea-level is rising along the North Coast of Kuwait Bay. The rate of rise is higher in the North section than in the Middle and South sections. The study also shows that the sea-level is rising faster in the winter than in the summer. The study concludes that the sea-level is rising along the North Coast of Kuwait Bay, and this is a cause for concern. The study also suggests that further research should be conducted to investigate the causes of the sea-level rise and to develop strategies to mitigate its effects.

Keywords: Sea-level, Kuwait Bay, North Coast, Rising sea-level.

Jawad, 2021-03-30 The Arabian Seas Marine Region encompasses marine areas from Djibouti to Pakistan including the northern part of Somalia the Red Sea the Arabian Persian Gulf and parts of the Arabian Sea

Human pressures on the coastal and marine environments are evident throughout the region and have resulted in harmful environmental effects. Oil and domestic urban and industrial pollutants in several areas of this part of the world have caused local habitat degradation, eutrophication and algal blooms. Further coastal landfill dredging and sedimentation as well as nutrient and sediment runoff from phosphate mining, agriculture and grazing and reduction in freshwater seepage due to groundwater extraction are all contributing to the degradation of coastal environments. This book discusses aspects not covered in other books on the region which largely focus on marine biodiversity and examines several environmental challenges that are often ignored but which have a significant impact on the environment. Evaluating the status quo it also recommends conservation measures and examines the abiotic factors that play a major main role in the environmental changes. Lastly the book addresses the biodiversity of the area providing a general context for the conservation and management measures discussed. *Proceedings of the 27th International Geological Congress*, 1984-12 **Dosariyah: An Arabian Neolithic Coastal Community in the Central Gulf** Philipp Drechsler, 2018-08-13 Describes the work carried out by the joint German Saudi Dosariyah Archaeological Research Project DARP between 2010 and 2014 at Dosariyah located in the Eastern Province of Saudi Arabia **Quaternary Carbonate and Evaporite Sedimentary Facies and Their Ancient Analogues** Christopher G. St. C. Kendall, Abdulrahman S. Alsharhan, 2011-02-18 This book is part of the International Association of Sedimentologists IAS Special Publications. The Special Publications from the IAS are a set of thematic volumes edited by specialists on subjects of central interest to sedimentologists. Papers are reviewed and printed to the same high standards as those published in the journal *Sedimentology* and several of these volumes have become standard works of reference. This volume commemorates the eclectic research of Douglas James Shearman into evaporites which was initiated by his studies of the prograding UAE coastal sabkhas or salt flats that incorporate evaporite minerals which displace and replace earlier carbonate sediments. His subsequent proselytization of the study of ancient evaporites in sedimentary sections all over the world led to fundamental advances in our understanding of arid zone carbonate sedimentology. The papers presented here are based on presentations made in Abu Dhabi UAE 12-14th October 2004 and 7th-8th November 2006. They provide a retrospective from the 1960s and 70s of Holocene evaporites and carbonates recapturing Shearman's contribution by revisiting the Holocene coastal evaporite and carbonate sediments of the Arabian Persian Gulf from Abu Dhabi, Qatar and Oman. The first set of papers considers these sediments from the perspective of their coastal geomorphology, sedimentary character and their geochemistry. Later papers examine the significance of these settings in the ancient geological section world wide including examples from the Mesozoic-Cenozoic of the Moroccan Atlantic margin and the Upper Jurassic Arab Formation of the Arabian Gulf. *Sabkha Ecosystems* Bilquees Gul, Benno Böer, M.
