Changing Social Science Critical Theory And Other Critical Perspectives:

Changing Social Science Daniel R. Sabia, Jerald Wallulis, 1983-06-30 Changing Social Science is both a description of and prescription for the current unease in the social sciences. It brings together articles by philosophers, sociologists, and political scientists who advocate changing the way social science is conceived and practiced. Focusing on the thought of past and present critics and proponents of critical inquiry, especially on the critical theory of Jürgen Habermas and on the disciplines of political science and sociology, collaborators on this volume support a critical form of social and political inquiry, outline its main characteristics, and examine its foundations, options, and unresolved problems. The book is divided into sections on reflexivity, methodology, and explanation, and criticism and advocacy. From an introductory overview of the collection of articles and an account of the central issues in critical inquiry, discussions ensue on the methodological inadequacies and political implications of naturalist approaches to social and political inquiry, the nature and foundations of interpretive approaches to social science, the role, nature, and limits of causal explanations and causal theories of human action, the role of values in research and theory, and defenses and criticisms of the normative aspirations of both Habermas's critical theory and of critical social science in general.

Critical Theory and Methodology Raymond A. Morrow, David D. Brown, 1994-06-24 Critical Theory traces its roots from Marxism through the renowned Frankfurt School to a wide array of national and cultural traditions. Raymond Morrow's book traces the history and outlines the major tenets of critical theory for an undergraduate audience. He exemplifies the theory through an analysis of two leading social theorists, Jürgen Habermas and Anthony Giddens. Unique to this volume is the emphasis on the link between Critical Theory and empirical research and social science methodology, often thought to be incompatible.

Critical Theory and Public Life John Forester, 1987 Jürgen Habermas's critical communications theory of society has excited widespread interest in recent years. The essays in this book explore the research implications of Habermas's theory for the analysis of modern problems of public life. Spanning the spectrum of the social sciences, the essays relate critical theory to industrial policy, under advanced capitalism, education, the mass media, and consumerism, public participation in planning, policy analysis, and critical historical studies. John Forester is Associate Professor of City and Regional Planning at Cornell University. Critical Theory and Public Life is included in the series Studies in Contemporary German Social Thought, edited by Thomas McCarthy.

R. DeProspero, 1990 This volume is the most comprehensive compilation of ideas related to library performance yet assembled.

It brings together noted researchers and successful library directors and educators who have extended the landmark findings and efforts of their mentor and friend Ernest DeProsp. The editors give a historical account of contemporary measurement activities suggest methodologies for measuring performance offer viewpoints on planning goal setting and validity and comment on problems associated with planning one of the major tools of measurement. Readers of the book will develop informed opinions about planning a practice that when entered into unaware can enslave an organization in endless data gathering routines and tax their endurance beyond reasonable points. Thought provoking comments on the directions taken and not taken by library thinkers challenge the reader to speculate about current library think.

Stability and Change in Revolutionary Pennsylvania George David Rappaport, 1996. *Stability and Change in Revolutionary Pennsylvania* examines the society and economy of Pennsylvania from about 1740 to 1790 the period that many historians have identified as formative in the making of modern America. Did the Quaker province become truly modern during this period? No says George Rappaport but he suggests that by 1790 modernization had begun. Rappaport is almost unique among early American historians in his application of explicit social scientific models to historical evidence. In the first part of the book he offers an analysis of Pennsylvania's social structure the families communities voluntary associations political parties and social classes that made up the social order. He distinguishes among the economic political and social spheres and finds the simultaneous maturing of a traditional social order and the birth pangs of a modern one. If the economy was not yet capitalist the political sector was strikingly modern. The social sphere was a complex mix of informal and flexible social groupings social classes and voluntary associations that included firefighting companies immigrant aid societies and Benjamin Franklin's Junto. In the second part of the book Rappaport uses his model of the social structure to develop an innovative analysis of the establishment of the Bank of North America America's first commercial bank in Philadelphia in 1781. In addition to exploring early banking Rappaport offers a pathbreaking narrative of the Constitutionalist Party's repeal of the act incorporating the bank and of the successful campaign led by Robert Morris and the bank's directors to survive the loss of the charter and then restore it. He finds that the creation of commercial banks and the appearance of antibanking in the 1780s presages in significant ways the process of modernization America was to experience in the following centuries.
