Changing Structures On Inequality A Comparative Perspective:

Changing Structures of Inequality Yannick Lemel, Heinz Noll, 2002-05-02 *Changing Structures of Inequality* examines these questions in a new comparative perspective covering five national societies Canada France Germany Spain and the United States The authors offer a deep analysis of country specific research traditions in the fields of class analysis and social stratification revealing important conceptual differences which have consequences for the diagnoses They present the results of substantial comparative studies on different aspects of inequality in developed societies the inequality of income and wealth educational inequalities status crystallization migration and inequality gender inequality and the structuring effect of social class highlighting similarities as well as substantial differences between the societies under examination The authors offer a nuanced conclusion that puts in perspective the different topics of this contemporary debate Developed societies are now characterized by more dynamic and pluralistic structures of inequalities where classes have lost some of their previous importance but to some extent still have a place Contributors include Howard M Bahr Mathias B s Gary Caldwell Salustiano del Campo Theodore Caplow Louis Chauvel Michel Forse Wolfgang Glatzer Richard Huaser Paul W Kingston Denise Lemieux Laura Maratou Alipranti and Marion Mohle

Language and Social Structure in Urban France

David Hornsby, 2017-07-05 The coming together of linguistics and sociology in the 1960 s most notably via the work of William Labov marked a revolution in the study of language and provided a paradigm for the understanding of variation and change Labovian quantitative methods have been employed successfully in North America the UK Scandinavia and New Zealand but have had surprisingly little resonance in France a country which poses many challenges to orthodox sociolinguistic thinking Why for example does a nation with unexceptional scores on income distribution and social mobility show an exceptionally high degree of linguistic levelling that is the elimination of marked regional or local speech forms And why does French appear to abound in hyperstyle variables which show greater variation on the stylistic than on the social dimension in defiance of a well established theory than such variables should not occur This volume brings together leading variationist sociolinguists and sociologists from both sides of the Channel to ask what makes France exceptional In addressing this question variationists have been forced to reassess the accepted interdisciplinary consensus and to ask as sociolinguistics has come of age whether concepts and definitions have been transposed in a way which meaningfully preserves their original sense and crucially takes account of recent developments in sociology Sociologists for their part have focused on the largely neglected area of language variation and its implications for social theory Their findings therefore transcend the case study of a particularly enigmatic country to raise important theoretical questions for both disciplines

[The Routledge Handbook of Contemporary Inequalities and the Life Course](#) Magda Nico, Gary Pollock, 2021-12-30 Drawing upon perspectives from across the globe and employing an interdisciplinary life course approach this handbook explores the production and reproduction of different types of inequality across a variety of social contexts Inequalities are not static easily measurable

and essentially quantifiable circumstances of life They are processes which impact on individuals throughout the life course interacting with each other accumulating attenuating reproducing or distorting themselves along the way The chapters in this handbook examine various types of inequality such as economic gender racial and ethnic inequalities and analyse how these inequalities manifest themselves within different aspects of society including health education and the family at multiple levels and dimensions The handbook also tackles the global COVID 19 pandemic and its striking impact on the production and intensification of inequalities The interdisciplinary life course approach utilised in this handbook combines quantitative and qualitative methods to bridge the gap between theory and practice and offer strategies and principles for identifying and tackling issues of inequality This book will be indispensable for students and researchers as well as activists and policy makers interested in understanding and eradicating the processes of production reproduction and perpetuation of inequalities The Tocqueville Review Tocqueville Society,2003 **Handbook on Demographic Change and the**
