ABSTRACT (ABSTRACT)

Christopher Hill, the Montague Burten Professor of International Relations at the London School of Economics and Politics, has done the field of FPA a profound service in writing *The Changing Politics of Foreign Policy*. His book, the first of its kind to accommodate fully the implications of September 11 and its aftermath, should be read by all practitioners of FPA and all those who aspire to make the serious study of foreign policy their vocation. Policymakers may also benefit by reading the book, if only to expose themselves to the analytic hurdles that confront scholars who approach FPA as more than an exercise in journalism or polemics.

FULL TEXT

The field of foreign policy analysis (FPA), always introspective, has undergone a new self-appraisal in recent years, due largely to changes in the global landscape that have redefined the role of states, private groups, economic pressures, and ecological problems in shaping the foreign policies of governments today. The terrorist attacks of September 11, 2001, provided only the most dramatic jolt to business-as-usual in FPA. Even without this dreadful reminder, the old world of state-centrism and static modeling of "rational" behavior was no longer adequate for scholars who shared an interest in making their work more valid scientifically, pedagogically useful, and relevant to policymakers.

Christopher Hill, the Montague Burten Professor of International Relations at the London School of Economics and Politics, has done the field of FPA a profound service in writing *The Changing Politics of Foreign Policy*. His book, the first of its kind to accommodate fully the implications of September 11 and its aftermath, should be read by all practitioners of FPA and all those who aspire to make the serious study of foreign policy their vocation. Policymakers may also benefit by reading the book, if only to expose themselves to the analytic hurdles that confront scholars who approach FPA as more than an exercise in journalism or polemics.

The scope of the book could hardly be more sweeping. The two introductory chapters raise the key challenges to FPA, introduce us to competing approaches, and provide a preview of transcending themes such as the agency-structure problem, limits of state sovereignty, and globalization. The first part of the book is devoted to the question of agency. Its four chapters explore the roles and behavioral patterns of governmental leaders and bureaucrats, the bounds of rational action, and the obstacles to implementing foreign policy, particularly to melding diplomacy, security policy, and economic relations.

These largely domestic phenomena are then placed in the context of the international processes that increasingly constrain the options and choices of those who make foreign policy. Part 2 considers the impact of economic globalization on human and political geography and examines the coexistence of state actors with private groups
