Changing Student Attendance Patterns: Challenges for Policy and Practice Jacqueline E. King, Eugene L.

Anderson, Melanie E. Corrigan, 2003-05-21 With data illustrating emerging attendance trends in student college attendance patterns this volume provides concise analysis and perspectives from experts in the field on how policymakers and institutions can accommodate student choices maintain academic integrity and promote student success **John Dewey and the Future of Community College Education** Clifford P. Harbour, 2015-01-15 Honorable Mention 2016 PROSE Award Education Theory Today community colleges enroll 40% of all undergraduates in the United States In the years ahead these institutions are expected to serve an even larger share of this student population However faced with increasing government pressure to significantly improve student completion rates many community colleges will be forced to reconsider their traditional commitment to expand educational opportunity Community colleges therefore are at a crossroads Should they focus on improving student completion rates and divert resources from student recruitment programs Should they improve completion rates by closing developmental studies programs and limiting enrollment to college ready students Or can community colleges simultaneously expand educational opportunity and improve student completion In John Dewey and the Future of Community College Education Cliff Harbour argues that before these questions can be answered community colleges must articulate the values and priorities that will guide them in the future Harbour proposes that leaders across the institution come together and adopt a new democracy based normative vision grounded in the writings of John Dewey which would call upon colleges to do much more than improve completion rates and expand educational opportunity It would look beyond the national economic measures that dominate higher education policy debates today and would prioritize individual student growth and the development of democratic communities Harbour argues that this in turn would help community colleges contribute to the vital work of reconstructing American democracy John Dewey and the Future of Community College Education is essential reading for all community college advocates interested in taking a more active role in developing the community college of the future *College Students in the United States* Kristen A. Renn, Robert D. Reason, 2012-11-05 College Students in the United States accounts for contemporary and anticipated student demographics and enrollment patterns a wide variety of campus environments and a range of outcomes including learning development and achievement Throughout the book the differing experiences needs and outcome of students across the range of traditional 18 24 years old full time students and non traditional for example adult and returning learners veterans recent immigrants are highlighted The book is organized for use as a stand alone resource around Alexander Astin s Inputs Environment Outputs I E O framework **History of Universities** Mordechai Feingold, 2004-04-08 Volume XIX 1 of History of Universities contains the customary mix of learned articles book reviews conference reports and bibliographical information which makes this publication such an indispensable tool for the historian of higher education Its contributions range widely geographically

chronologically and in subject matter The volume is as always a lively combination of original research and invaluable reference material

**Nontraditional College Attendance** Cecilia Ceja, 2005 [Creating a Culturally Inclusive Campus](#) Barbara J. Hoekje, Scott G. Stevens, 2017-12-14 Colleges and universities increasingly recruit international students yet may lack the systems to foster these students academic success and identity as valued members of the campus community Sharing case studies of students and examples of innovative initiatives this book explores strategies and key recommendations for universities to re conceptualize their programs to better welcome and support international students Emphasizing the relational aspect of academic and campus life the authors provide a framework that supports students from initial contact through graduation Carefully researched and addressing issues of language engagement and culture [Creating a Culturally Inclusive Campus](#) offers universities innovative strategies for helping all students fulfill their academic goals while also contributing meaningfully to their school's global mission

*How the Student Credit Hour Shapes Higher Education: The Tie That Binds* Jane V. Wellman, 2003-08-21 The student credit hour SCH is truly the coin of the realm within the U S system of higher education Initially designed to translate high school course work it now measures everything from student learning to faculty workload It shapes how time is used and how enrollments are calculated and underpins cost and performance measures This American invention is one of the features that knit together our otherwise disparate system of higher education Yet the rationale for the metric has long since gone unexamined and the measure itself may be perpetuating bad habits that get in the way of institutional change in higher education The chapters in this book deconstruct the SCH credit hour and how it has come to be used in American higher education to examine whether it has become an obstacle to needed change It is a fascinating journey into the sociological evolution of the current organization and governance of American higher education This is the 122nd issue of the quarterly journal *New Directions for Higher Education*

*STEM Models of Success* J. Luke Wood, Robert T. Palmer, 2014-03-01 As the U S focuses on positioning itself to retain and advance its status as a world leader in technology and scientific innovation a recognition that community colleges are a critical site for intervention has become apparent Community colleges serve the lion's share of the nation's postsecondary students In fact 40% of all undergraduate students are enrolled in community colleges these students account for nearly 30% of all STEM undergraduate majors in postsecondary institutions These students serve as a core element of the STEM pipeline into four year colleges and universities via the community college transfer function Moreover community colleges are the primary postsecondary access point for non traditional students including students of color first generation low income and adult students This is a particularly salient point given that these populations are sordidly underrepresented among STEM graduates and in the STEM workforce Increasing success among these populations can contribute significantly to advancing the nation's interests in STEM As such the community college is situated as an important site for innovative practices that have strong implications for bolstering the nation's production and sustenance of a STEM labor force In

recognition of this role the National Science Foundation and private funding agencies have invested millions of dollars into research and programs designed to bolster the STEM pipeline From this funding and other independently sponsored inquiry promising programs initiatives and research recommendations have been identified These efforts hold great promise for change with the potential to transform the education and outcome of STEM students at all levels This important book discusses many of these promising programs initiatives and research based recommendations that can impact the success of STEM students in the community college This compilation is timely on the national landscape as the federal government has placed increasing importance on improving STEM degree production as a strategy for America s future stability in an increasingly competitive global marketplace Informed by research and theory each chapter in this volume blazes new territory in articulating how community colleges can advance outcomes for students in STEM particularly those from historically underrepresented and underserved communities **New Directions for Higher Education** ,1976
