Changing Times In Teacher Education Restructuring Or Reconceptualising:

Changing Times in Teacher Education , **Changing Times and Teacher Education** Marvin Wideen, Peter Philip Grimmert, 1995 *Changing Times In Teacher Education* Marvin F. Wideen, Peter P. Grimmert, 2013-05-13 Pressures for reform in teacher education have begun to take on the same sense of urgency as school reform Those faculties of education who have been strong advocates for change in the schools now find themselves the subject of similar pressures from governmental policy makers Attempts at change have taken place in many different countries and jurisdictions around the world This book details through a series of international vignettes how teachers are responding to the changing times and social contexts in which they do their work The authors hold the view that changes are inevitable in teacher education but what is not clear is who will control the changes and whether the end result will actually improve the preparation of teachers The theme of the book is that the reform of teacher education should be informed by intelligent debate and that any attempt to restructure teacher preparation should result from a careful reconceptualisation of its purposes and processes Critical Reflections on Teacher Education in South Africa Labby Ramrathan, Suriamurthe Maistry, Sylvan Blignaut, 2024-06-19 This edited volume focuses on Curriculum scholars critical reflections on teacher education TE within South Africa to offer insights into critical considerations for the socio economic transformational social and environmental justice and decolonization challenges that the country faces Much of the literature on teacher education takes on a policy and practice focus to the exclusion of deep and fundamental curriculum questions on what is teacher education for for whom where and who decides Within South Africa the Minimum Requirements for Teacher Education Qualification MRTEQ forms the official policy that informs teacher education curriculum and certification to become a teacher This volume raises critical and complicated questions for teacher educators and curriculum scholars to inspire a deeper understanding of teacher education beyond a set of parochial policy prescribed modules courses that one needs to take to become a professional teacher

World Yearbook of Education 2002 Elwyn Thomas, 2012-10-02 This text examines four key areas of teacher education These are theories models and ideologies of teacher education the control of teacher education by the state and the role of schools and HE cultural perspectives and the education of teachers and continuities in teacher education *Schooling, Human Capital and Civilization* Bruce Moghtader, 2023-08-18 This book explores the formation of human capital in education interrogating its social and ethical implications and examining its role in generating policies and practices that govern curriculum studies as an academic field Using an inquiry approach and offering an intellectual history of human capital theory through a genealogical methodology the author begins by contextualizing the formation of the theory and explores its correlation with the history of imperialism Tracing the concept of human capital from ancient slave societies to colonial empires the book arrives at the modern formulations of the concept in education systems and explores its impact on curriculum and pedagogy in the digital age Asking whether an approach that represented slaves machines animals and

property in its history is appropriate for forward looking democratic societies the author then uncovers crucial implications for educational equity and teacher development Presenting a unique genealogy of schooling humans as economic resources and offering a descriptive and critical analysis of its impact on education as lived experience the author excavates ideas and mentalities by which we think about modern schooling processes This approach supports the intellectual development of teachers and offers a critical assessment of power knowledge relations in curriculum studies Discerning associations between the human capital theory of education and technological progress with implications for ethics in the digital age it will be an outstanding resource for scholars and graduates working across comparative and international education the history of education curriculum studies digital education and curriculum theory Teacher Education Elwyn Thomas,2002 Focusing on values in education these writings present current debates on fundamental issues These include who decides the values what are the key accompanying issues and what are their religious moral and political dimensions and implications

Quality Assurance, Reform and IT in Teacher Education Yin Cheong Cheng,2002-09 **Changing Patterns of Teacher Education in South Africa** Keith Lewin,Dr. Michael Samuel,Yusuf Sayed,2003 This book explores policy and practice in Teacher Education in South Africa and their implications for the future It arises from the work of the Multi Site Teacher Education Research Programme MUSTER co ordinated by the University of Sussex in five countries of which South Africa is one Teacher education in South Africa is in transition The first wave of educational reform rightly focused on the need to develop a post apartheid school curriculum and the new structures that were needed to support different approaches to learning Teacher education was made a Provincial competence and left largely untouched until new norms and standards and a regulatory framework began to be developed **Issues in Education** ,1999 **Alberta Journal of Educational Research** ,2004

Mentor Development in the Education of Modern Language Teachers Carol Gray,2001 Part 2 consists of contributions from current language mentors who have undertaken to research aspects of their own practice with a view to improvement and Part 3 offers case studies of interaction between mentors and their student teachers Each chapter within these three Parts ends with an invitation to mentor readers to consider aspects of their own work in the light of the important issues raised The final section of the book presents a vision of entitlement for student teachers school based mentors and higher education tutors involved in the education of language teachers **BOOK JACKET** Back to Good Teaching John Halliday,1996

This text offers support to those who believe that no amount of administrative development curricular development management reorganizations quality audits or any related endeavour is as important to education as the promotion and maintenance of good teaching The idea that good teaching can somehow be ensured by attempting to standardize practice is rejected instead the author argues that good teaching consists of a set of diverse practices that are sustained by professional discourse and that are subject to democratic accountability *Michigan Journal of Community Service Learning* ,1999 **The Politics of Teacher Education Reform** National Commission on Teaching & America's

Future (U.S.),2000-04-18 Yearbook of the Politics of Education Association A competent caring and qualified teacher for every student in the United States This audacious goal is taken right from the opening pages of the report of the National Commission on Teaching and America s Future NCTAF What Matters Most Teaching for America s Future The NCTAF findings are so powerful and unique that The Politics of Teacher Association PTA uses them as the basis for this 2000 Y yearbook Editors Gallagher and Bailey along with leading educators explore the controversies and ramifications of the Commission s major recommendations Get serious about standards for both students and teachers Reinvent teacher preparation and professional development Overhaul teacher recruitment and put qualified teachers in every classroom Encourage and reward teaching knowledge and skill Create schools that are organized for student and teacher success The contributors to this book speak to the underlying assumptions research bases and values found in the recommendations Long time and persistent issues about teaching teacher education programs and public policy making are examined under the new light of the latest research Real life successes of the recommendations in action are shown in two state level stories and an urban school partnership This PEA 2000 yearbook will prove a valuable resource for students researchers and all educators interested in teacher education reform in the 21st century **Teacher Education in the English-Speaking World** Tom A. O'Donoghue,Clive Whitehead,2008-04-08 This book compares teacher education across ten English speaking regions using a long standing comparative approach It includes twelve chapters an introductory chapter and one for each region written by experts It aims to structure understanding at the macro level and facilitate crossnational communication Exploring the Development of Teacher Identity Kathleen A. Travers,2000 **Action Research as a Living Practice** Terrance R. Carson,Dennis J. Sumara,1997 This book aims to enlarge understandings of educational action research Drawing from complexity theory deep ecology Eastern philosophy hermeneutics phenomenology psychoanalysis postmodernism and literary theory the essays in this collection show how participation in educational action research practices requires more of the researcher than the application of research methods Each essay demonstrates how action research is a lived practice that asks the researcher to not only investigate the subject at hand but as well to provide some account of the way in which the investigation both shapes and is shaped by the investigator Student Writing in Higher Education Mary Rosalind Lea,Barry Stierer,2000 This is the first book to examine student writing in the context of major changes taking place in today s higher education For example students now come to higher education from an increasingly wide range of cultural and linguistic backgrounds to study in a number of diverse learning environments Their courses often no longer reflect traditional academic subject boundaries with their attendant values and norms there is also an increasing recognition of the importance of lifelong learning and the necessity for universities to adapt their provision to make it possible for learners to enter and return to higher education at different points in their lives □□□□□□□□□□--□□□□□□□□ ,1995
