Vahvanen, 2022-02-25. The hymn of Digitalization is nothing new. We must encourage the creation of new apps. We must develop AI in order to prevail among international competition. Technology's advance will halt climate change and let robots do the dumb stuff for us. Our faith in technology is powerful because it has saved us in the past. *The Almighty Machine* shows us technology's flip side. The things that once powered us toward a brighter tomorrow are already undermining our quality of life. The data stream has shattered our concentration, human relationships have been reduced to a menu of emojis, constant surveillance has nullified much of our privacy and the development of AI could be the beginning of the end for us. We are becoming the casualties of our own success. Pekka Vahvanen's bristling and timely critique deftly translated by Mark Jones throws doubt on the necessity of technological development in a world saturated in tech. *The Almighty Machine* presents an important question: Does progress no longer make us happier? Artificial Intelligence as an Additional Tool in Customer Relationship Management and the Impact after the COVID-19 Crisis Leonard Rupperti, 2022-12-16. Masterarbeit aus dem Fachbereich Informatik. K nstliche Intelligenz. Sprache: Deutsch. Abstract: The aim of the research of this present work is to answer which criteria make an AI-driven CRM successful, what opportunities and challenges there are and how the general population assesses this topic. Furthermore, it is important to see that the corona pandemic is having an impact on the use of AI. For this purpose, the following two research questions were asked: How does AI strengthen the customer relationship CRM? Will the Corona pandemic accelerate the use of AI? To answer the research questions, a quantitative study on people's current opinions and attitudes towards AI and how it will change as a part of the outbreak of the pandemic was conducted. Specifically, the study deals with artificial intelligence in customer service, the change of AI in companies due to Covid 19 and how people generally view the topic of AI. The participants surveyed were anonymous of different age groups, occupations and origins, as this topic affects everyone today and it is important to pay attention to the opinion of the general population. The targeted use of artificial intelligence in customer relationship management to make the work of companies and their employees more efficient and of higher quality, also about the customer, is on the rise. More and more sales are generated by this technology and more and more AI-controlled tools are being developed, which make customer management more successful and thus intensify the relationship between customers and companies. Thus, it is necessary to understand such

technologies and how they are designed but also what opinion the general society has on this rather revolutionary technology

John R McIntyre, Georgia Institute of Technology, US. The book is a must have for any student, library executive or entrepreneur contemplating the business environment in China. In an important society where clout is paramount and relationship is key, the book's listing of Who's Who in China is essential to success. An essential read for anyone thinking of doing business in China. J Mark Munoz, Munoz and Associates International and author of *A Salesman in Asia*. For anyone interested in interacting with China, whether doing business or not, it would be advantageous to know thy foe and thyself as Sunzi Sun Tzu put it. And this work will definitely be conducive to your gaining an insight on contemporary China and its economic boom. It can be used as a reference tool or read as a textbook. Highly recommended for college and public libraries. Shixing Wen, Editor in Chief, Chinese Librarianship, Former President, Chinese American Librarians Association and Councilor, American Library Association. This exhaustive resource provides comprehensive coverage of the major players in the Chinese economy since the reform era which began in 1978. It includes 200 entries briefly summarizing each individual's life and career with a central focus on his or her accomplishments and the key roles played in the economic development of China. The emphasis of the book is on the movers and shakers of China's new economy, highlighting notable figures from both the initial economic liberalization period and the renewed growth from the early 1990s to the present time. This invaluable dictionary is the result of collaborative efforts across the globe. Over forty scholars from the United States, mainland China and Taiwan, United Kingdom, Germany, France, Japan, and the Soviet Union contributed to this work.
