**Works** Ronald T. Kneusel, 2023-10-24 AI isn't magic How AI Works demystifies the explosion of artificial intelligence by explaining without a single mathematical equation what happened when it happened why it happened how it happened and what AI is actually doing under the hood Artificial intelligence is everywhere from self driving cars to image generation from text to the unexpected power of language systems like ChatGPT yet few people seem to know how it all really works How AI Works unravels the mysteries of artificial intelligence without the complex math and unnecessary jargon You'll learn The relationship between artificial intelligence machine learning and deep learning The history behind AI and why the artificial intelligence revolution is happening now How decades of work in symbolic AI failed and opened the door for the emergence of neural networks What neural networks are how they are trained and why all the wonder of modern AI boils down to a simple repeated unit that knows how to multiply input numbers to produce an output number The implications of large language models like ChatGPT and Bard on our society nothing will be the same again AI isn't magic If you've ever wondered how it works what it can do or why there's so much hype How AI Works will teach you everything you want to know War Faces on Screen Katy Parry, Mani Sharpe, 2025-12-11 How have images of the face been used to document and distort the phenomenon of war Such is the question that drives this book with the face forming a recurring almost ubiquitous motif throughout visual depictions of military conflict At once interdisciplinary transnational and transhistorical War Faces on Screen is organised into three sections Section One examines representations of the face in war photography illustrating how photographers have visualised the invisible violence of psychic trauma Ethical and political concerns are at the forefront of each essay from the advocacy work of portraiture to AI tools capable of generating a range of aesthetically convincing yet potentially discriminatory images Section Two focuses on the aesthetics of the cinematic close up drone vision and how the selective digital colourisation of bodies and faces from archival footage works to impose a moral hierarchy Section Three concludes the book with a focus on colonisation decolonisation and defacement extending earlier discussions of the imperial violence found in recent Hollywood films where empathy is displaced from the ethnic other to the suffering Western soldier Our final chapters chart how the face is central to articulating the meaning and sentiment of colonial and civil wars with even seemingly progressive documentaries perpetuating unequal power dynamics and problematic notions of victimhood

Foregrounding the work of artists and practitioners alongside theoretical frameworks War Faces on Screen ultimately forms a radically innovative contribution to the study of image making and war making **AI ...** ,2005 **AI Magazine** ,2004
