 Popular and Indispensable: Theory, Research and Practice* Rong Lian, Chang Liu , Juzhe Xi, 2024-07-17 Online learning has  
 become more and more common globally whether for comfort adapting to work hours or just having the freedom to study  
 from anywhere And now under the coronavirus pandemic as people are having to stay at home it has become more important  
 than ever Although the popularity of wireless network and portable smart device makes it possible for people to acquire and  
 learn knowledge anytime and anywhere it does not necessarily mean an increased learning performance Relevant research in  
 cognitive science has revealed possible limitations in online learning For example the knowledge acquired through online  
 learning tends to be fragmented and lacks guidance for integrated thinking among different subjects which makes it difficult  
 for learners to form a systematic knowledge structure Learners may experience cognitive overload metacognitive illusion and  
 low learning efficiency in self regulated learning It follows that in the post COVID 19 era online learning puts forward new  
 requirements and challenges to the contemporary students not only to their learning strategies but positive character traits  
 in learning Most of the current learning theories were developed in the early 20th century and may not fit in well with the  
 current situation then possibly leading to inefficient learning and increased learning burden Therefore it is necessary and  
 important to reexplore the influencing factors and mechanisms that affect the learning efficiency of students at all levels  
 nowadays based on which we could construct a theoretical model of efficient learning model      *The AI Revolution:
