Kate Crawford, 2021-04-06 The hidden costs of artificial intelligence from natural resources and labor to privacy and freedom What happens when artificial intelligence saturates political life and depletes the planet How is AI shaping our understanding of ourselves and our societies In this book Kate Crawford reveals how this planetary network is fueling a shift toward undemocratic governance and increased inequality Drawing on more than a decade of research award winning science and technology Crawford reveals how AI is a technology of extraction from the energy and minerals needed to build and sustain its infrastructure to the exploited workers behind automated services to the data AI collects from us Rather than taking a narrow focus on code and algorithms Crawford offers us a political and a material perspective on what it takes to make artificial intelligence and where it goes wrong While technical systems present a veneer of objectivity they are always systems of power This is an urgent account of what is at stake as technology companies use artificial intelligence to reshape the world Inhuman Power Nick Dyer-Witheford, Atle Mikkola Kjosen, James Steinhoff, 2019-06-20 Artificial Intelligence AI has seen major advances in recent years While machines were always central to the Marxist analysis of capitalism AI is a new kind of machine that Marx could not have anticipated Contemporary machine learning AI allows machines to increasingly approach human capacities for perception and reasoning in narrow domains This book explores the relationship between Marxist theory and AI through the lenses of different theoretical concepts including surplus value labour the general conditions of production class composition and surplus population It argues against left accelerationism and post Operaismo

thinkers asserting that a deeper analysis of AI produces a more complex and disturbing picture of capitalism's future than has previously been identified. Inhuman Power argues that on its current trajectory AI represents an ultimate weapon for capital. It will render humanity obsolete or turn it into a species of transhumans working for a wage until the heat death of the universe, a fate that is only avoidable by communist revolution.
