Collective Clientelism The Lome Conventions And North South Relations:

Collective Clientelism John Ravenhill, 2010-06-01 *Collective Clientelism Asymmetric Power Relations and International Trade Law* Inebu C. Agbo-Ejeh, 2024-12-31 The book offers an analysis of the contradictions between theory and practice in the trading system It contextualises the colonial legal structure and its impact on the peripheral countries and their participation and gain in the multilateral trading system The book's core argument effectively situates Economic Partnership Agreements in the systemic asymmetry which characterises the relationship between developed and developing countries in global trade It applies the idea of asymmetry to the relationship between the core countries the EU USA and the peripheral countries ACP in the GATT multilaterally and in the EU ACP trade relationship bilaterally The book identifies that core provisions in the WTO regime such as the special and differential treatment as well as GATT Article XXIV have not lived up to expectations Underscoring the asymmetrical participation and dominant role of former colonial powers the book demonstrates how although trade is generally considered a catalyst for economic growth developed countries have safeguarded their domestic markets while exerting pressure on developing countries to liberalise and compete The European Union has taken measures to address the development concerns of African Caribbean and Pacific countries through the Lome Conventions and Cotonou Agreement however these relationships still retain and reinforce colonial paternalism evidenced by recent trade agreements An alternative possibility multipolarity holds promise for African countries especially intra African trade and critical engagement with China The book is an invaluable resource for scholars postgraduate students government officials and policymakers as it offers a comprehensive understanding of the complexities of trade negotiations and agreements

Integrating Human Rights into Development Cooperation: The Case of the Lomé Convention Karin Arts, 2021-08-04 Human rights democracy and governance concerns are prominent elements in the development cooperation policy of the European Community The relations between the European Community EC and 71 developing countries in Africa the Caribbean and Pacific ACP have proved to be a laboratory for developing ideas on these matters for translating them into binding treaty norms and for applying them in practice The experiences gained in the ACP EC relationship carry special value because they are the product of dialogue and joint decision making between groups of developed and developing states Therefore 25 years of ACP EC cooperation under the Lome Convention provide a rich learning ground for anybody involved or interested in the debate on linking development cooperation to human rights and to human rights related concerns This book explores the international law aspects of the subject It first investigates the general international legal basis for linking development cooperation to human rights democracy and good governance Both the negative and positive ways of making such a linking by punitive and supportive measures are addressed The book then delves into the evolution of Lome treaty norms on the subject and into the concrete human rights practices that took shape under them It explores the contributions to and influence of both the EC and ACP states on those treaty provisions and practices A comprehensive overview is

provided of the support measures and sanctions resorted to in response to the human rights situation in ACP countries The book assesses the overall experiences gained and presents a synthesis of factors that proved to be constraints or conducive to the efforts to integrate human rights fully into ACP EC development cooperation The insights gained could well inform similar efforts undertaken by others *The Cambridge History of the European Union: Volume 1, European Integration Outside-In* Mathieu Segers, Steven Van Hecke, 2023-11-09 Volume I examines the history of the European Union from an outside in perspective asking the following questions how does the European Union look from the outside and which outside forces shaped and guided the process of European integration Split into three parts the first addresses the main external events that have steered the European integration process with emphasis placed on critical junctures following the Second World War such as the division and reunification of Germany and the Eastern enlargement Part II considers the various international trends that have shaped European integration with particular focus on globalisation and geopolitics While the first two parts pay special attention to institutions countries international organisations and the main actors Part III focuses on the role of ideas networks public opinion and memory that influenced the development of the European Union
