Collected Works Of Eric Voegelin:

On the Form of the American Mind Eric Voegelin, 1995 In 1924 not quite two years after receiving his doctorate from the University of Vienna Eric Voegelin was named a Laura Spelman Rockefeller Memorial Fellow and thus given the opportunity to pursue postdoctoral studies in the United States For the next twenty four months Voegelin worked with some of the most creative scholars in America and at several of the country's great universities an experience that undoubtedly influenced his scholarly and personal perspectives throughout his life A more immediate result was the publication in 1928 of *On the Form of the American Mind* the young philosopher's first major work in which his acute perceptions and analyses combine with a conceptual vocabulary struggling to find its own coherence and form Voegelin begins his inquiry into the form of the American mind with a complex discussion of the concepts of time and existence in European and American philosophy and continues with an extended interpretation of George Santayana a study of the Puritan mystic Jonathan Edwards a presentation on Anglo American jurisprudence and a consideration of the historian economist and political scientist John R Commons Voegelin was particularly interested in Commons views on the mental political social and economic aspects of democracy in modern urban and industrial America Although admitting that this diversity of themes seems only loosely connected Voegelin demonstrates the actual overall unity of these various subjects each concerns linguistic expressions of a theoretical nature Analysis of *On the Form of the American Mind* indicates that Voegelin integrated the approaches of *Lebensphilosophie* into what Georg Misch called the philosophical combination of anthropology and history which characterized contemporary trends within the discourse of the *Geisteswissenschaften* and finally resulted in a theoretical paradigm of philosophical anthropology Jürgen Gebhardt and Barry Cooper provide access to this brilliant study with their two part introduction The first part considers *On the Form of the American Mind* in the context of methodological debates ongoing in Germany at the time Voegelin was writing the book the second describes Voegelin's American experience and compares his work with similar studies written during the post World War I period *Published Essays, 1953-1965* Eric Voegelin, 2000 The period covered by the material published in this volume marks the transition in Eric Voegelin's career from Louisiana to Munich After twenty years in the United States in 1958 Voegelin accepted an invitation to fill the political science chair at Ludwig Maximilian University a position left vacant throughout the Nazi period and last occupied by the famous Max Weber who had died in 1920 The themes most prominent in the fourteen items reprinted here reflect the concerns of a transition not only in a scholar's career and in the momentous shifts in world politics taking place around him but also in the development of his understanding of the stratification of reality and the attendant demands for a science of human affairs adequate to the challenges posed by the persistent crisis of the West in its latest configurations and by contemporary philosophy Several of the items herein originated as talks to a specific organization on problems facing German democratization and the development of a market economy amid the ruins of a fragmented culture and

infrastructure in a society without historically evolved institutional supports for a satisfactory social and political order Accordingly pragmatic matters occupy a central place in a number of these pieces especially the overriding question of how Germany could move from an illiberal and ideological political order into a modern liberal democratic one Those accustomed to the theoretical profundity of Voegelin s writings may find welcome relief in the down to earth commonsensical drift of this material addressed often to laymen and businessmen But of course the philosophical subject matter lurks everywhere It finds full expression in several instances as the controlling context of even the least pretentious presentations One of the attractions of these essays is what the author brings forward as serviceable elementary guideposts under adverse conditions of intellectual disarray social decay and turmoil

History of Political Ideas Eric Voegelin,1997 The series will publish all of philosopher Voegelin s 1901 1985 works including the previously unpublished multi volume History of Political Ideas of which this is the second volume Completed in 1944 it is not a conventional chronological account but an original comprehensive account of the political thought and experiential underpinnings that typified the medieval period A survey of the structure of the period is followed by analysis of the Germanic invasions the fall of Rome and the rise of empire and monastic Christianity climaxing in a study of Saint Thomas Aquinas Annotation copyrighted by Book News Inc Portland OR

This volume contains selected correspondence written by Eric Voegelin during the period 1924 to 1949 The Editorial Board of the Collected Works of Eric Voegelin agreed from the beginning that a representative number of Voegelin s letters should complete the edition in an attempt to provide the reader with insights into Voegelin s intellectual life and into the fundamental experiences that went into shaping the growth of his personality It was the board s aim to select material in accordance with the guidelines that Voegelin himself laid down as fundamental to a hermeneutical understanding of spiritual

reality Voegelin wrote that in studying a thinker one must try to elucidate the biographical radices of philosophizing. He said that one must penetrate to the experiences that impel him toward reflection and do so because they have excited consciousness to the awe of existence. Voegelin made these remarks on the occasion of conducting anamnestic experiments which reveal the motivational center of his own life. At the core of Voegelin's concept of political science is a noetic interpretation of man, society and history that confronts the conception of order prevalent in the surrounding society with the criteria of the critical knowledge of order. From the 1930s onward Voegelin labored to find a satisfactory self-reflexive explication of the principles of a contemplative understanding of human reality, one grounded in the spiritual experience of reason. Naturally it is the published word that determines a thinker's scholarly stature. But Voegelin's letters also grant insight into the development of his thought, document the author's struggle with himself, the telos of his scholarship and reveal an often involuntary conflict with his life-world. These letters shed light on an ongoing and open-ended thought process from which a multifaceted, sometimes apparently contradictory work emerged. Because of the enormous number of letters that Voegelin wrote in his later years, now published in the second volume of the Selected Correspondence, Volume 30 of the Collected Works, the editors agreed that these books would contain only letters from Eric Voegelin. While such a selection of letters cannot provide the completeness that the publication of both dialogue partners would provide, nevertheless they reveal Voegelin's ongoing reflection on human affairs. They reveal patterns of thought and their development in the atmosphere of intimate communication that personal and intellectual elective affinities produce and they also disclose the silences that accompany such discourse. This volume is certain to interest all readers concerned with political theory and with better understanding of Voegelin's intellectual pilgrimage from his earliest academic years to his emergence as one of the most significant philosophers of our time.
