Collections in Context Karen Fresco, 2020-06-25 The fourteen essays that comprise *Collections in Context* The Organization of Knowledge and Community in Europe interrogate questions posed by French Flemish English and Italian collections of all sorts libraries as a whole anthologies and miscellanies assembled within a single manuscript or printed book and even illustrated ivory boxes Collecting became an increasingly important activity during the fourteenth through seventeenth centuries when the decreased cost of producing books made ownership available to more people But the act of collecting is never neutral it gathers information orders material especially linear texts and prioritizes everything in short collecting both organizes and comments on knowledge Moreover the context of a collection must reveal something about identity but whose That of the compiler The reader or viewer The donor The patron With essays by a wide array of international scholars *Collections in Context* demonstrates that the very act of collecting inevitably imposes some kind of relationship among what might otherwise be naively thought of as disparate elements and simultaneously exposes something about the community that created and used the collection Thus *Collections in Context* offers unusual insights into how collecting both produced knowledge and built community in early modern Europe *Collections in Context : the Organization of Knowledge and Community in Europe* Karen Fresco, 2018 *Collections in Context* C. D. Waterston, National Museums of Scotland, 1997 **Museums, Objects, and Collections** Susan Pearce, 2017-08-15 This book examines the historical context of museums their collections and the objects that form them Susan M Pearce probes the psychological and social reasons that people collect and identifies three modes of collecting collecting as souvenirs as fetishes and as systematic assemblages She considers how museum professionals set policies of collection management acquire study and exhibit objects and make meaning of the objects in their care Pearce also explores the ideological relationship between museums and their collections and the intellectual and social relationships of museums to the public *Collections in Context* Heckscher Museum, 1986 *Databases and Information Systems II* Hele-Mai Haav, Ahto Kalja, 2013-03-09 Databases and database systems in particular are considered as kernels of any Information System IS The rapid growth of the web on the Internet has dramatically increased the use of semi structured data and the need to store and retrieve such data in a database The database community quickly reacted to these new requirements by providing models for semi structured data and by integrating database research to XML web services and mobile computing On the other hand IS community who never than before faces problems of IS development is seeking for new approaches to IS design Ontology based approaches are gaining popularity because of a need for shared conceptualisation by different stakeholders of IS development teams Many web based IS would fail without domain ontologies to capture meaning of terms in their web interfaces This volume contains revised versions of 24 best papers presented at the 5th International Baltic Conference on Databases and Information Systems BalticDB IS 2002 The conference papers present original research results in the novel fields of IS and
