Neal-Barnett,Josefina M. Contreras,Kathryn A. Kerns,2000-04-30 Why is it that relationships with family members predict the quality of children s relationships outside the family A wealth of research has documented that various aspects of family relationships are predictably related to the quality of children s interactions and relationships with peers Understanding what account for these effects is important both for theories of children s relationships and intervention efforts to ameliorate children s peer relationship difficulties This volume advances the field by discussing several mechanisms that may account for continuities across family and peer relationships A variety of theoretical perspectives are represented in the book For example both learning and biological explanations are considered Authors also note two key considerations in investigating family and peer relationships First it is necessary to consider the cultural context The function and meaning of family and peer relationships may differ depending on what roles are played by these relationships in different cultural contexts Second it is necessary to consider the child s age

Developmental issues such as concerns with establishing greater independence at the entrance to adolescence will impact both family and peer relationships

Parenting Anna Marina Mariani, 2008 The book provides a necessary commitment for a stronger preventive attitude to parenting in other words parents could and should educate themselves for parenthood in order to be able to provide their children those guiding maps for personal growth

Attributing so much importance to a self formation in motherhood and fatherhood does not reduce the family to a secondary social role in order to avoid pathological issues and intergenerational clashes rather it wants to urge in committing for their children s growth formation without any neurotic search for perfection and educational abstentions

Will we be able to support those adults willing to be good parents but not parents acting well

The book tries to offer theoretical views choosing to privilege the informality that the family code requires in order that those parents in normal situations and not only those who have problems or difficulties would find guiding lines to appropriately face common and general issues this not according to the strict canons of formal education but to an education among adults that does not enclose the family in material and always private and individual experiences to the detriment of spiritual and more general dimensions
