Final Solutions Benjamin A. Valentino, 2013-01-19 Benjamin A Valentino finds that ethnic hatreds or discrimination undemocratic systems of government and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society Mass killing in his view is a brutal political or military strategy designed to accomplish leaders most important objectives counter threats to their power and solve their most difficult problems In order to capture the full scope of mass killing during the twentieth century Valentino does not limit his analysis to violence directed against ethnic groups or to the attempt to destroy victim groups as such as do most previous studies of genocide Rather he defines mass killing broadly as the intentional killing of a massive number of noncombatants using the criteria of 50 000 or more deaths within five years as a quantitative standard *Final Solutions* focuses on three types of mass killing communist mass killings like the ones carried out in the Soviet Union China and Cambodia ethnic genocides as in Armenia Nazi Germany and Rwanda and counter guerrilla campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan Valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing

be paid by individuals and groups for the decision to begin such a forceful struggle the possibility of escaping the colonizers value system through reverse discourse and the limits and possibilities of writing violence In a reversal of older master narratives of the postcolonial nation contemporary Caribbean works have produced new definitions of nationhood which nevertheless keep the nation intact as a site of agency and create an alternative vision of the Americas which could serve to remap the geo political boundaries existing on the American continent today

Genocide in Rwanda Carol Rittner, John K. Roth, Wendy Whitworth, 2004-08-23 In 1994 genocide put Rwanda on the map for most of the world It also exposed one of the most shameful scandals of the Rwandan churches the complicity of the Christian churches in the genocide Rwanda is the most Christian country in Africa More than 90% of its people are baptized Christians with the Roman Catholic and Anglican Churches having the greatest number of adherents According to Archbishop Desmond Tutu The story of Rwanda shows both sides of our humanity The churches were sometimes quite superb in what they did in the face of intimidation and at great cost to themselves But there were other times when they failed dismally and seemed to be implicated in ways that have left many disillusioned disgruntled and angry Genocide In Rwanda provides a variety of perspectives through which to assess the complex questions and issues surrounding the topic and even raise some new questions that could provide some new insight into this historical event They are questions we must ask otherwise how can the Church begin to make moral restitution change structures and behaviors and once again reveal the human face of God in our fragile world
