Collectors And Collections:

The Nature of Classical Collecting Alexandra Bounia, 2017-07-05 Contrary to general traditional belief the origins of collecting as a systematic activity that refers to the satisfaction of symbolic rather than actual needs was not an invention of the Renaissance Collecting made its first appearance in European prehistory was a subject of interest and debate for the ancient Greeks and Romans and has been present continuously ever since The Nature of Classical Collecting is the first thorough discussion of collecting in the ancient classical world Based on extensive research of the literary sources available and complemented wherever necessary from references to archaeological and epigraphic evidence it is a thought provoking attempt to consider a phenomenon which has been in the centre of the western mind set since its very early origins The Art Collector's Handbook Ms Mary Rozell, 2014-06-28 With the rapid and unprecedented global expansion of the art market new collectors are emerging every day When buying art whether for pure enjoyment for investment or some other motive few art collectors consider the practical and financial implications of owning and maintaining art and many do not have a plan for how they might eventually dispose of it This book probing a number of resources and incorporating advice from top experts in the field offers guidance on collection management and care and serves as an important reference guide for collectors and those charged with managing collections The Collector's Dilemma Jeanne Siegel, 2006-04 Collecting has become a national pastime but what happens to collectors and their collections is a topic that is rarely discussed If collectors are savvy fate can be very kind if not they and their heirs will be disappointed The Collector's Dilemma is for collectors who are undecided about the destination of their collection Author and appraiser Jeanne Siegel discusses reasons to keep a collection intact and the procedures that new collectors should follow She also offers expert advice on the following topics Deals with selling options Compiling an inventory Auction advice Dealer information Restoration Wills Inherited collections Donations Tax forms In addition The Collector's Dilemma debunks misconceptions about collecting For instance television road and auction shows highlight single pieces worth small fortunes instead of featuring entire collections When thinking of moving a collection collectors should realize that this in itself does not imply a loss Instead considering an exchange for a collection can be a smart move leading to cash to sweeten a retirement account finance dream vacations or fund college for grandchildren Collectors may consider the prestige and pleasure of donating their collections to a museum university or library Perfect for new and old collectors heirs of collectors estate lawyers and dealers The Collector's Dilemma will help those who are in the process of building or disposing of collections **Collectors, Collections and Museums** Stacey Pierson, 2007 This book presents the first comprehensive study of the collecting consumption and display of Chinese porcelain in Britain from the 16th to the 20th century as well as the impact of this activity on British culture Beginning with the early porcelains acquired as objects of exotica and vessels for the consumption of tea and coffee followed by porcelains for display in the country house interior the first part of this book reveals the role of porcelain in Britain's developing

economic relations with China and the impact of this material on both daily life and interior design The subsequent diplomatic and political conflicts of the 18th and 19th centuries provide a framework for an examination of British consumption of Chinese porcelain as both spoils of war and iconic representations of China material which helped to shape and influence British perceptions of China The final section demonstrates how these perceptions of China and its porcelain began to change significantly in the 20th century with porcelains acquired as works of art and displayed publicly in museums Collectors in Britain began to specialise in this area and actively invented a field of Chinese ceramics that was promulgated by learned societies and culminated in the founding of a museum of Chinese ceramics in London by one of the foremost British collectors Sir Percival David who donated his world class collection to the University of London in 1950

Collectors and Curiosities Krzysztof Pomian, 1991-01-15 This outstanding and highly original study examines the history of collecting in early modern Europe and describes the myriad treasures from paintings and antiques to religious relics that found their way into the private collections and public museums of the time The author looks at the types of people who formed collections from the harmless eccentrics to the wily speculators and examines what they collected and why He develops a historical anthropology of collecting and sheds new light upon the genesis of the modern museum Pomian charts the changes in fashion which characterised the world of collecting arguing that such shifts can be seen as a sign of wider and more profound changes in mentality and can be analysed in terms of a conflict between aesthetic and historical sensibilities

Obsessions Stephen Calloway, Katherine Sorrell, Deidi von Schaewen, 2004 Obsessions examines the extraordinary phenomenon of collecting A brief and entertaining history of the collecting mania from ancient times reveals both famous and almost forgotten collections of the past

Women Patrons and Collectors Andrea M. Gáldy, 2011-10-18 In looking at the history of collecting one may be excused for regarding it as an activity in which traditionally women have shown little interest or in which they have not been involved As the present volume shows women particularly aristocratic women not only resisted this discrimination through the ages but also built important collections and used them to their own advantage in order to make statements about their lineage power cultural heritage or religious preferences That is not to say that there was not an increasing number of middle class women who became draughtswomen painters and natural scientists and who

found it equally beneficial for their chosen profession to collect. In every case the female collector chose to collect and what to collect she chose how and where to present the collection and she also decided when to dispose of objects thereby occasionally taking on a curatorial role. Women have been seen as gatherers of furnishings, jewellery, dress and objects of domestic life. This third volume in the *Collecting it* thus seeks to give a voice to a group of important female collectors from the sixteenth to the early nineteenth century whose importance for the history of collecting has not yet or not sufficiently been acknowledged.

Curiosity and Enlightenment Arthur MacGregor, 2007. Offers a history of museum collecting in western Europe over the course of its formative centuries tracing its origins from the culture of collecting that emerged during the Renaissance which served the purposes of both prestige and academic enquiry.

Collecting the Past Toby Burrows, Cynthia Johnston, 2019. *Collecting the Past* brings together the latest research on several significant British collectors from the eighteenth to the twentieth centuries. Considering the aims and motives that led these collectors to assemble such remarkable collections, the book also examines the fate of these collections after the collectors' deaths.

Passionate Curiosities Lauren Elizabeth Talalay, Margaret Cool Root, 2015. *Passionate Curiosities* explores the collections held in the University of Michigan's Kelsey Museum of Archaeology through the lens of the people whose intellectual interests, financial backing and social networks brought artifacts to Ann Arbor from the 1880s to the 1990s. Through purchases and expeditions, these individuals shaped the Museum's internationally recognized antiquities from the ancient civilizations of Greece, Rome, North Africa, Egypt and the Near East, extensive photographic documentation of these regions from the early 1900s and significant assemblages of early Christian and Islamic visual culture. An intriguing array of personalities from archaeologists, missionaries and diplomats to industrialists, bankrollers and inventors weave through these pages. They include Ernst Herzfeld, the eminent Orientalist who helped forge antiquities legislation in Iran; Luigi Cesnola, the rapacious harvester of Cypriot sites; Esther Van Deman, the pioneering feminist and scholar of Roman construction techniques; and Samuel Goudsmit, the renowned nuclear physicist and avid Egyptologist. World famous dealers who established standards in antiquities connoisseurship likewise populate these sagas. Readers will encounter Edgar J. Banks, a swashbuckling purveyor of Mesopotamian antiquities and entrepreneur of biblical documentary films; Maurice Nahman, the lion of Cairo; and the colorful members of the Tano dealer dynasty in Egypt. This copiously illustrated book will interest general readers as well as scholars curious about the holdings of the Kelsey, early collectors and dealers and the history of museums.

To Have and to Hold Philipp Blom, 2004-06-01. This curiously moving history traces the development of collections since the Renaissance through lively portraits of famous collectors. *The New Yorker*: From amassing sacred relics to collecting celebrity memorabilia, the impulse to hoard has gripped humankind throughout the centuries. But what is it that drives people to possess objects that have no conceivable use? *To Have and to Hold* is a captivating tour of collectors and their treasures from medieval times to the present, from a cabinet containing unicorn horns and a Tsar's collection of teeth to the macabre art of embalmer Dr

Collecting and the Princely Apartment Susan

Bracken, 2020-05-15 Collecting is an obsession that goes back to the mists of history While spare time and spare cash seem an absolute necessity for this kind of activity every collector has his or her own approach to the formation of a collection The way in which one's treasures are displayed is another important instance in which one collector differs from another Glass cases niches trays cupboards or drawers have been adopted sometimes cards offer information on the subject its age and provenance an overall theme may have prompted the choice of the actual objects displayed together security reasons suggest one room over another While some collectors keep their treasures as close as possible in their bedroom throughout their living quarters or in a locked up closet nearby others may find that they want to be able to show off their collection without being disturbed by visitors in the rooms in which they actually spend most of their time Certainly our notions of private and public have changed considerably over the centuries and this has had an impact on questions of display and on the separation of particular parts of the house from other less accessible ones in particular in great houses that allow for the establishment of a museum The museum in such cases is quite separate from the living quarters for example situated on the ground floor off the main hall Not all displays were so defined there were many forms of exhibition just as there were many forms of collections The aims and ambitions of the collector are often discussed in terms of the display of their collections in part because we believe that analysing how a collection was shown and how it was received are key contributors to our understanding the role and purpose of the collection In lieu of any other documentation inventories sales catalogues and wills remain essential tools for the historian of collecting both in terms of what was owned and where it was housed This volume the second in a series of four presents ten articles that explore the connection between collections and their display in near or separate from the princely apartment within a time frame that runs from the sixteenth century to the early nineteenth and within a geographical area that includes courts on the Italian peninsula in England France The Netherlands and Germany
