College Counseling issues strategies:

College Counseling Deborah C. Davis, Keren M. Humphrey, 2000 This book serves as a guide for counselors who are working in higher education and can be used as a resource book for individuals involved in counselor preparation programs. It explores college counseling as a profession, examines the diverse characteristics of today's college students, and details the variety of roles and services provided by college counselors. The book is organized into four sections: Part 1, The College Counseling Profession, provides an introduction to college counseling as a profession, including its history and current status, diverse institutional settings, and professional preparation; Part 2, Counseling Today's College Students, presents an overview of the diverse characteristics of today's college students, with special attention to traditional and nontraditional learners and minority and international students; Part 3, Today's College Counselor and the Institution, explores the diverse roles and services provided by the counselors and makes recommendations regarding effective practices; Part 4, College Counselors and the Future, looks at stories from day to day life of college counselors and examines ways counselors can maintain wellness amid the demanding environment. The book is designed to provide an overview of the holistic, developmentally based profession of college counseling and does not duplicate related publications of other authors about specific topics such as student affairs, preparation techniques for counseling special populations, or cybercounseling. Resources are included that will assist readers in further exploring their interests. Contains 474 references and 8 appendixes. JDM *Being a College Counselor on Today's Campus* Bruce S. Sharkin, 2012-04-27 There has been increasing attention in recent years, both positive and negative, on college student mental health and the provision of counseling services on campus. At the same time, there continue to be misperceptions of college counselors both within and outside college campuses. Drawing on over 20 years of experience as a college counselor, Dr. Sharkin addresses these misunderstandings, providing a detailed description and discussion of the many roles and contributions these professionals have. He explores topics such as the history of college counseling and its evolution, who college counselors are, how someone can become a college counselor, and what skills are needed to be a college counselor today. Roles and responsibilities, including counseling, crisis intervention, consultation, outreach, and administrative duties, are discussed in detail and supplemented with both research and case studies. Diversity, competencies, and special challenges faced by today's college counselors are also considered. This engaging and accessible book will be a valuable resource for those already working in college mental health settings and those wishing to enter the field.
