The Last Professors Frank Donoghue, 2018-04-03 What makes the modern university different from any other corporation asked Columbia's Andrew Delbanco recently in the New York Times There is more and more reason to think less and less he answered In this provocative book Frank Donoghue shows how this growing corporate culture of higher education threatens its most fundamental values by erasing one of its defining features the tenured professor Taking a clear eyed look at American higher education over the last twenty years Donoghue outlines a web of forces social political and institutional dismantling the professoriate Today fewer than 30 percent of college and university teachers are tenured or on tenure tracks and signs point to a future where professors will disappear Why What will universities look like without professors Who will teach Why should it matter The fate of the professor Donoghue shows has always been tied to that of the liberal arts with the humanities at its core The rise to prominence of the American university has been defined by the strength of the humanities and by the central role of the autonomous tenured professor who can be both scholar and teacher Yet in today's market driven rank and ratings obsessed world of higher education corporate logic prevails faculties are to be managed for optimal efficiency productivity and competitive advantage casual armies of adjuncts and graduate students now fill the demand for teachers Bypassing the distractions of the culture wars and other crises Donoghue sheds light on the structural changes in higher education the rise of community colleges and for profit universities the frenzied pursuit of prestige everywhere the brutally competitive realities facing new Ph D's that threaten the survival of professors as we've known them There are no quick fixes in The Last Professors rather Donoghue offers his fellow teachers and scholars an

essential field guide to making their way in a world that no longer has room for their dreams First published in 2008 The Last Professors have largely had its arguments borne out in the interim as the percentage of courses taught by tenured professors continues to dwindle This new edition includes a substantial Preface that elaborates on recent developments and offers tough but productive analysis that will be crucial for today's academics to heed **Bulletin of the American Association of**

Selling Hope and College Alex Posecznick, 2017-04-25 It has long been assumed that college admission should be a simple matter of sorting students according to merit with the best heading off to the Ivy League and highly ranked liberal arts colleges and the rest falling naturally into their rightful places Admission to selective institutions where extremely fine distinctions are made is characterized by heated public debates about whether standardized exams high school transcripts essays recommendation letters or interviews best indicate which prospective students are worthy And then there is college for everyone else But what goes into less selective college admissions in an era when everyone feels compelled to go regardless of preparation or life goals Ravenwood College where Alex Posecznick spent a year doing ethnographic research was a small private nonprofit institution dedicated to social justice and serving traditionally underprepared students from underrepresented minority groups To survive in the higher education marketplace the college had to operate like a business and negotiate complex categories of merit while painting a hopeful picture of the future for its applicants *Selling Hope and College* is a snapshot of a particular type of institution as it goes about the business of producing itself and justifying its place in the market Admissions staff members were burdened by low enrollments and worked tirelessly to fill empty seats even as they held on to the institution's special spirit Posecznick documents what it takes to keep a mediocre institution open and running and the struggles tensions and battles that members of the community tangle with daily as they carefully walk the line between empowering marginalized students and exploiting them **The Qualified Student** Harold S.

Wechsler,2014-09-15 In *The Qualified Student* Harold S Wechsler focuses on methods of student selection used by institutions of higher education in the United States More specifically he discusses the way that college and university reformers employed those methods to introduce higher education into a broader cross section of America by extending access to an increased number of students from nontraditional backgrounds Implicit in much of this book is an underlying social and ethical question How legitimate was and is higher education s regulation of social mobility Public concern over colleges and universities practices became inevitable once they became regulators between social classes The challenging of colleges admissions policies in the courts augments similar concerns that have been present in legislatures for decades The volume is divided into three main sections Prerequisites Columbia and the Selective Function and Implications It focuses mainly on four universities The University of Michigan Columbia University the University of Chicago and the City University of New York Wechsler maintains that unlike other universities these institutions were pacesetters they did not adopt a new policy simply because some other college had already adopted it A new introduction brings the book originally published in 1977 up to date and demonstrates its continuing importance in today s academic world of selective admissions

Personal Qualities and College Admissions Warren W. Willingham,Hunter M. Breland,Philip A. Griswold,Shula Minsky,1982 The extent to which personal and academic factors are important in college admission decisions was studied in 1978 based on data on 25 000 applicants to 9 colleges Colgate University Williams College Ohio Wesleyan University Kenyon College Kalamazoo College Occidental College Hartwick College University of Richmond and Bucknell University It was found that each college placed primary emphasis on academic factors three times as much weight as personal ratings High school rank and test scores were weighted about equally In order to examine the effect of personal qualities on selection decisions residual selection rates were computed for a number of different characteristics At the most selective institutions various personal qualities played a preferential role in selection decisions Minority status had the largest residual selection rate of any characteristic Other background characteristics with positive residuals were those that tended to indicate some degree of affiliation with the college e g alumni children The findings contradict however any assumption that socially or economically privileged groups received preference in selection decisions Personal qualities seemed to come into play mostly when admission was uncertain or unlikely Attention was also directed to the effect of self selection by students on application and college selection the way that characteristics of freshmen classes differ by college the way that personal qualities relate to success and persistence in the freshman year and the research literature on admissions A questionnaire and application forms and bibliography are appended SW

Maximizing Intervention Effectiveness Christopher Yoi Tibbetts,2017 First generation college students students for whom neither parent has a four year college degree earn lower grades and worry more about whether they belong in college compared to continuing generation students who have at least one parent with a four year college degree We conducted a longitudinal follow up of participants from a study in which a values affirmation

intervention improved performance in a biology course for first generation college students and found that the treatment effect on grades persisted three years later First generation students in the treatment condition obtained a GPA that was on average 18 points higher than first generation students in the control condition three years after values affirmation was implemented Study 1A We explored mechanisms by testing if the values affirmation effects were predicated on first generation students reflecting on interdependent values thus affirming their values that are consistent with working class culture or independent values thus affirming their values that are consistent with the culture of higher education We found that when first generation students wrote about their independence they obtained higher grades both in the semester in which values affirmation was implemented and in subsequent semesters and felt less concerned about their background In a separate laboratory experiment Study 2 we manipulated the extent to which participants wrote about independence and found that encouraging first generation students to write more about their independence improved their performance on a math test Study 3 implemented three different values affirmation interventions that tested the effectiveness of encouraging students to write more about their independence interdependence or both in a field study conducted at two year colleges throughout the state of Wisconsin The results of Study 3 highlighted challenges and differences in the way students respond to a values affirmation intervention across different institutional contexts Taken together these studies provide insight into the potential of values affirmation interventions to improve performance for first generation students

Leveling the Playing Field Robert K. Fullinwider, Judith Lichtenberg, 2004-04-02 Leveling the Playing Field examines the admissions policies of contemporary American colleges and universities in light of the assumption that enhancing the educational opportunities of lower income and minority students would make American society more just It asks how current admissions policies affect the prospects of such students and it evaluates alternative approaches The book treats a variety of topics relevant to answering these questions What does it mean to reward people according to merit Is the American system of higher education a meritocracy and should it be How do the missions of contemporary institutions of higher education bear on admissions What are the implications of the Supreme Court's landmark affirmative action decisions of 2003 What is the proper role and significance of standardized tests like the SAT How does lower education prepare students or fail to for higher education In answering these questions the book examines legacy preference early admissions policies financial aid the test prep industry college counseling and athletics evaluating their effects on the distribution of higher education in the United States not only for lower income and minority students but for college bound students in general

College For Every Student Rick Dalton, Edward P. St. John, 2016-08-12 College For Every Student shares best practices for raising college and career aspirations and increasing educational opportunities for underserved and diverse students in rural and urban districts Providing guidance for educating your students and organizing communities for expanding educational opportunities this is a must read for every school leader

and counselor interested in promoting educational uplift This comprehensive guidebook offers a wealth of resources and tools for educators and professionals to help students build essential college and career readiness skills College For Every Student gives you the research based proven strategies needed for promoting the core student skills essential for college and career readiness aspiration grit perseverance adaptability leadership and teamwork **You're Accepted** Katie Malachuk,2013-12 You re Accepted is wonderfully written in a style that will appeal to everyone involved in the process student parent guidance counselor Elizabeth Lesser cofounder of the Omega Institute and New York Times bestselling author of Broken Open How Difficult Times Can Help Us Grow Students may worry about SATs and grades but university admissions coach Katie Malachuk knows that it takes much more than numbers to chart the right path to college To help applicants and their families make enlightened decisions she transforms the application process into one of self discovery rather than self delusion Katie s approach strips away the destructive competitive energy and replaces it with revelations about how to uncover your innate talents and true self With great humor and insight You re Accepted makes a convincing case that presenting the real authentic you not some smooth packaged version actually increases your chances of getting into college The former admissions director shares insider tips on everything from writing essays to seeing things from the admissions committee s point of view You re Accepted brings higher fulfillment to higher education by helping you get into the college that s right for you the one that will help you become the person you re meant to be *What You Don't Know Can Keep You Out of College* Don Dunbar,G.F. Lichtenberg,2007-07-05 In the tradition of The Gatekeepers a veteran counselor provides the missing key to the college admissions door with insider wisdom about how admissions committees think and the thirteen fatal mistakes that can ruin an application When Don Dunbar was a college counselor for Phillips Academy Andover in the 1980s he got to sit in on the meetings where the nation s top colleges decided whether to admit his students Prep school counselors no longer get this kind of astonishing access but in those meetings Don discovered a little known key to college admissions that still holds true today Many applicants look alike based on their grades test scores and extracurriculars so colleges want something more They want applicants with character Most of us know what character means but not in the way that admissions officers define it Admissions officers have tremendous integrity and to them character equals what a student will contribute to his or her community good or bad over the next four years Don explains the concept of character in terms that high school students can understand using examples from his thirty years of working with kids He shows readers how to avoid the thirteen fatal character mistakes that even the brightest students make when applying to college and democratizes the admissions process making his advice available to all students **Watsamatta U** Karin Kasdin,2002-06 Watsamatta U guides the reader through the author s own neurotic and chaotic experience with the college admission process Like so many Baby Boomers Kasdin falls into the trap of allowing college reputation to supersede the long term benefits of finding the right school for her son Dan With a healthy dose of humor Kasdin unveils invaluable tips for avoiding this competitive neurosis and
