The Theory of Architecture Concepts Themes Practices Paul Alan Johnson Although it has long been thought that theory directs architectural practice no one has explained precisely how the connection between theory and practice is supposed to work This guide asserts that architectural theory does not direct practice but is itself a form of reflective practice Paul Alan Johnson cuts through the jargon and mystery of architectural theory to clarify how it relates to actual applications in the field He also reveals the connections between new and old ideas to enhance the reader's powers of critical evaluation Nearly 100 major concepts themes and practices of architecture as well as the rhetoric of architects and designers are presented in an easily accessible format Throughout Johnson attempts to reduce each architectural notion into its essential concept By doing so he makes theory accessible for everyday professional discussion Topics are arranged under ten headings identification definition power attitudes ethics order authority governance relationship and expression Areas covered under these headings include Utopian thought in theories of architecture Advocacy and citizen participation in architecture The basis of architectural quality and excellence The roles of the architect as artist poet scientist and technologist Ethical obligations of architecture Rationales for models and methods of design How authority is determined in architecture How architects structure their concepts Conventions of communication within the architectural profession Each section begins by showing the etymology of key terms of the topic discussed along with a summary history of the topic's use in architecture Discussions probe the conceptual and philosophical difficulties of different theories as well as their potential and limitations in past and present usage Among the provocative issues discussed in terms of their relationship to architecture are chaos theory feminism service to the community and the use of metaphor Johnson points out with stunning clarity the intentions as well as the contradictions and inconsistencies of all notions and concepts All architects and designers as well as students and teachers in these disciplines will gain many insights about architectural thought in this groundbreaking text

Perspectives on Prayer and Spirituality Maurice Elliott,Patrick McGlinchey,2021-02-12 Spirituality has become a buzzword in our contemporary culture as individuals strive for meaning and fulfillment Its detachment from the church and conventional definitions of religious practice highlights the seeming redundancy of what has come before Spirituality in this light signals a new attempt to find wholeness unencumbered by outmoded doctrines and stale rituals It is the conviction of this publication that the intuition behind contemporary searches for spiritual reality is a good one It acknowledges that there must be more to life than what secular media or consumerism might tell us The joyful message of Perspectives on Prayer and Spirituality is that the spiritual quest is a valid one and worth exploring There is treasure to be found However the surprise is that we must rediscover what we have left behind In the words of G K Chesterton it is not that the Christian ideal has been tried and found wanting rather it has been found difficult and left untried This book offers us the tools to mine the riches of Christian spirituality and find that elusive treasure The title Perspectives on Prayer and Spirituality alerts us to the fact that life giving spirituality stems from relationship with a personal God who can be known

Music and Faith Jonathan Arnold, 2019 How do contemporary audiences engage with sacred music and what are its effects This book explores examples of how the Christian story is still expressed in music and how it is received by those who experience that art form whether in church or not Through conversations with a variety of writers artists scientists historians atheists church laity and clergy the term post secular emerges as an accurate description of the relationship between faith religion spirituality agnosticism and atheism in the west today In this context faith does not just mean belief as the book demonstrates the temporal linear relational and communal process of experiencing faith is closely related to music Music and Faith is centred on those who by and large are not professional musicians philosophers or theologians but who find that music and faith are bound up with each other and with their own lives Very often as the conversations reveal the results of this binding are transformative whether it be in outpourings of artistic expression of another kind or greater involvement with issues of social justice or becoming ordained to serve within the Church Even those who do not have a Christian faith find that sacred music has a transformative effect on the mind and the body and even to use a word deliberately employed by Richard Dawkins the soul JONATHAN ARNOLD is Dean of Divinity and Fellow of Magdalen College Oxford Before being ordained he was a professional singer and made numerous recordings with The Sixteen Polyphony the Gabrielli Consort and The Tallis Scholars among others He has previously published *Sacred Music in Secular Society* 2014 *The Great Humanists An Introduction* 2011 and *John Colet of St Paul's Humanism and Reform in Pre Reformation England* 2007
