**The International Responsibility of States for AI-enabled Space Activities** Stefan-Michael Wedenig, 2025-12-22  
Artificial Intelligence AI has permeated our every day lives What once was solely a human task has now been taken over by AI May it be credit card approvals customer support financial transactions medical imaging or software development there is AI working behind the scenes Outer space historically always amongst the most developed domains has not remained untouched for long and space applications have started to increasingly rely on AI However this increase in use also leads to a myriad of legal issues particularly the issue of responsibility and liability under Article VI and Article VII of the Outer Space Treaty and the Liability Convention Our legal norms may they be domestic or international in nature are ultimately built around human behaviour and when applied to AI might not function Should damage caused by an AI enabled space object arise it proves difficult to assess the responsibility of the appropriate State party under Article VI of the Outer Space Treaty or the liability of the launching State While legal literature is primarily concerned with domestic legal issues arising from the use of AI an in depth analysis concerning State responsibility and liability for AI enabled space activities is absent Space legal literature strongly favours a view advocating for the creation of new hard law in form of new binding legal instruments or the amendment of existing law Suggestions de lege ferenda are often relied on by authors Given the inherent difficulty in creating new law or amend existing legal instruments this book proposes to look towards the lex lata and argues that the existing legal norms of State responsibility State liability and treaty law are sufficient to govern the responsibility of States for their AI enabled space activities The present research looks at these issues from a public international law perspective and proposes a solution within the lex lata      **Collins Dictionary Electronics** Ian Robertson Sinclair, 2004 This dictionary covers areas such as microprocessor technology digital electronics telecommunications and consumer electronics from mobile phones to digital TV      **Investigating AI Readiness in the Maltese Public Administration** Marvic Sciberras, Alexiei Dingli, 2023-01-27 The book presents a unique study on the Artificial Intelligence AI readiness of public administrations focusing on the Maltese public administration as a case study This was conducted following the launch of the Malta AI National Strategy in 2019 Since the Maltese public administration is the driving force behind the integration of AI solutions nationwide the research is deemed necessary to understand whether the public workforce itself is ready to face the oncoming AI revolution The researchers applied a mixed methods approach to gain insight and a broader perspective of the status quo concerning AI adoption Important considerations that stem from this study include the need for increased AI knowledge among public administrators since the majority of respondents reported a lack of awareness of AI technologies and their deployment Understanding AI related advantages must be accompanied by a robust instructional effort at all levels of education It was unanimously agreed that the early inclusion of AI related courses in the Maltese educational system will

aid in developing a future AI savvy workforce Furthermore upskilling and reskilling the public officers will facilitate knowledgeable human capital and proficiencies required to effectively integrate AI solutions within society The study concludes by recommending several critical reforms within governments that will improve the AI readiness factor of any Public Administration
