Current Issues in Computational Linguistics: In Honour of Don Walker Antonio Zampolli, Nicoletta Calzolari, Martha Palmer, 1994-06-30 With this volume in honour of Don Walker *Linguistica Computazionale* continues the series of special issues dedicated to outstanding personalities who have made a significant contribution to the progress of our discipline and maintained a special collaborative relationship with our Institute in Pisa I take the liberty of quoting in this preface some of the initiatives Pisa and Don Walker have jointly promoted and developed during our collaboration because I think that they might serve to illustrate some outstanding features of Don's personality in particular his capacity for identifying areas of potential convergence among the different scientific

communities within our field and establishing concrete forms of cooperation. These initiatives also testify to his continuous and untiring work dedicated to putting people into contact and opening up communication between them, collecting and disseminating information, knowledge and resources and creating shareable basic infrastructures needed for progress in our field. Our collaboration began within the Linguistics in Documentation group of the FID and continued in the framework of the CCL International Committee for Computational Linguistics. In 1982 this collaboration was strengthened when at COLING in Prague I was invited by Don to join him in the organization of a series of workshops with participants of the various communities interested in the study, development and use of computational lexica.

*El derecho de Autodeterminación de los Pueblos en el siglo XXI* Martínez Jiménez, Aitor, 2022-01-01. En el presente trabajo he tratado de abordar la autodeterminación de los pueblos desde una posición libre de valores. Creyendo en la axiología que debe informar a todo analista cuando se adentra en sus objetos de estudio. Sobre todo en disciplinas que nos condicionan tanto como las Ciencias Sociales donde somos investigador y a la vez objeto del análisis. Somos sujetos que vivimos dentro de sistemas jurídicos y políticos y por ende presos de prejuicios analíticos que nuestra posición social nos impone. Pero mi intención ha sido aproximarme a este complejo objeto de estudio al margen de cualquier prejuicio político establecido tratando de no dejarme influir por la enorme carga de contenido partidista que siempre circula alrededor de la idea de la autodeterminación. La autodeterminación es una idea que ha informado toda la historia de la humanidad hasta llegar a nuestros días. En estos momentos su contenido jurídico la erige como una norma fundamental del ordenamiento jurídico internacional. Es invocada con mayor o menor acierto prácticamente a diario. En concreto en la actualidad se está produciendo una particular forma de expresión de la autodeterminación de los pueblos que merece ser tenida en cuenta. Me refiero a la conocida como secesión remedio posibilidad de admitir independencias unilaterales en casos de graves violaciones de derechos humanos contra una población territorialmente determinada. Solo con una aproximación detallada desde un plano histórico evolutivo y riguroso podremos lograr cierto rigor metodológico al adentrarnos en el tema o problema jurídico al que se enfrenta la sociedad internacional: armonizar el principio de integridad territorial con la defensa de los derechos humanos dentro de una institución como la autodeterminación. Este trabajo busca precisamente introducirse dentro de ese complejo trinomio que forman la autodeterminación, la integridad territorial y los derechos humanos. Todas ellas piezas fundamentales del tablero de ajedrez de esta sociedad internacional. Tres instituciones fundamentales del ordenamiento jurídico que en determinadas situaciones pueden llegar a interactuar de manera contradictoria.
