Microbe-Organic Interactions Qiaoyun Huang,Pan Ming Huang,Antonio Violante,2008-05-10 Minerals organic matter and microorganisms are the major solid components in soil systems These three constituents do not function independently but rather interact with each other constantly at all times and everywhere in the soil ecosystem The interactions profoundly affect a series of physical chemical and biological processes of soils including the behavior transformation and fate of various nutrients and pollutants The research on these interactions should thus be an important issue for Soil and Environmental Scientists Therefore the International Society of Soil Science established the Working Group MO in 1990 which was promoted to a new Commission 2 5 Soil Physical Chemical Biological Interfacial Interactions of the International Union of Soil Sciences IUSS in 2004 To date the Working Group has sponsored four international symposia and these conferences were held in Edmonton Canada 1992 Nancy France 1996 Naples Italy 2000 and Wuhan China 2004 respectively The 4th International Symposium on Interactions of Soil Minerals with Organic Components and Microorganisms ISMOM2004 was the first Inter Congress Symposium of IUSS Commission 2 5 The conference was cosponsored by the International Union of Pure and Applied Chemistry IUPAC Doctors P M Huang Canada A Violante Italy J M Bollag USA J Berthelin France J Zhou China and Q Huang China served in the Symposium Organizing Committee **Tailoring Surfaces: Modifying Surface**
