[Why Digital Transformations Fail](#) Tony Saldanha, 2019-07-23 Former Procter Gamble Vice President for IT and Shared Services Tony Saldanha gives you the keys to a successful digital transformation a proven five stage model and a disciplined process for executing it Digital transformation is more important than ever now that we're in the Fourth Industrial Revolution where the lines between the physical digital

and biological worlds are becoming ever more blurred But fully 70 percent of digital transformations fail Why Tony Saldanha a globally awarded industry thought leader who led operations around the world and major digital changes at Procter Gamble discovered it s not due to innovation or technological problems Rather the devil is in the details a lack of clear goals and a disciplined process for achieving them In this book Saldanha lays out a five stage process for moving from digitally automating processes here and there to making digital technology the very backbone of your company For each of these five stages Saldanha describes two associated disciplines vital to the success of that stage and a checklist of questions to keep you on track You want to disrupt before you are disrupted be the next Netflix not the next Blockbuster Using dozens of case studies and his own considerable experience Saldanha shows how digital transformation can be made routinely successful and instead of representing an existential threat it will become the opportunity of a lifetime AI ... ,2003 **AHA**

**Perspectives** ,1998 **The Fourth Intelligence Revolution** Anthony Vinci,2025-10-28 A former senior intelligence officer reveals how espionage is being transformed by a new global intelligence race driven by AI and competition with China and how this impacts all of our lives The new global intelligence competition has brought espionage into our workplaces and our living rooms Adversaries like China Iran and Russia have realized that the human element is the weakest link in our industrial and political infrastructure As a result they target all of us stealing our financial data and medical records eavesdropping on our conversations and using platforms like TikTok and Hollywood movies to influence our opinions The Fourth Intelligence Revolution reveals how the undercover adventures of World War II the spy versus spy confrontations of the Cold War and the find fix and finish counterterrorism missions after 9 11 have given way to the most dangerous period of espionage yet This eye opening account exposes how intelligence now permeates every corner of society from economic espionage and genetic data gathering to information operations targeting children through AI chatbots even extending to reconnaissance on the far side of the moon Both a warning and a call to action The Fourth Intelligence Revolution suggests that we are all in essence becoming intelligence officers and that citizens have both the power and responsibility to reclaim intelligence to safeguard and strengthen our democracy Four Battlegrounds Paul Scharre,2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club s Must Read Books An invaluable primer to arguably the most important driver of change for our future P W Singer author of Burn In An award winning defense expert tells the story of today s great power rivalry the struggle to control artificial intelligence A new industrial revolution has begun Like mechanization or electricity before it artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power especially among the AI superpowers China the United States and Europe Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game changing technology and dominate the future Four Battlegrounds argues that four key elements define this struggle data computing power talent and institutions Data is a vital resource like coal or oil but it must be collected and refined Advanced computer chips are the

essence of computing power control over chip supply chains grants leverage over rivals Talent is about people which country attracts the best researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre's account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China's National Team of leading AI companies to show the chilling synergy between China's government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct *Four Battlegrounds* offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order *The American Antiquarian and Oriental Journal* Stephen Denison Peet, J.
