**Media Backends** Lisa Parks, Julia Velkova, Sander de Ridder, 2023-12-05 Exploring how we make, distribute and consume today's media systems Media backends, the electronics, labor and operations behind our screens, significantly influence our understanding of the sociotechnical relations, economies and operations of media. Lisa Parks, Julia Velkova and Sander De Ridder assemble essays that delve into the evolving politics of the media infrastructural landscape. Throughout, the contributors draw on feminist, queer and intersectional criticism to engage with infrastructural and industrial issues. This focus reflects a concern about the systemic inequalities that emerge when tech companies and designers fail to address workplace discrimination and algorithmic violence and exclusions. Moving from smart phones to smart dust, the essayists examine topics like artificial intelligence, human-machine communication and links between digital infrastructures and public service media alongside investigations into the algorithmic backends at Netflix and Spotify, Google's hyperscale data centers and video on demand services in India. A fascinating foray into an expanding landscape of media studies, *Media Backends* illuminates the behind-the-screen processes influencing our digital lives.
