Clabical Decision Problem:

Medical Decision Making Harold C. Sox, 2007 Since it was first published in 1988 Medical Decision Making has become the world wide standard textbook for medical decision making Written to meet the needs of medical students and experienced clinicians alike this book is a clearly presented step by step guide to understanding how through the processes of decision analysis a physician can reach valid reasoned conclusions about medical treatment despite imperfect information about the patient The focus of Medical Decision Making is on estimating probability measuring the inaccuracy of clinical data and interpreting new information then making choices should the patient be treated should more information be obtained or should nothing be done The authors make extensive use of clinical examples to illustrate Bayesian analysis formal decision analysis and basic concepts of how to evaluate the usefulness of diagnostic tests in various situations The text is supplemented with many illustrations useful end of chapter self assessment questions an appendix giving the sensitivity and specificity of nearly 100 diagnostic tests and a selective annotated bibliography directing the reader to significant articles in the current literature

Gibaldi's Drug Delivery Systems in Pharmaceutical Care Mary Lee, Archana Desai, 2007 Tying together concepts of traditional pharmaceuticals in a way this text focuses on the selection of appropriate dosage forms as an integral part of drug therapy

Clinical Decision Analysis Milton C. Weinstein, Harvey V. Fineberg, 1980 *Difficult Decisions in Thoracic Surgery* Mark K. Ferguson, 2007-03-12 Why do thoracic surgeons need training in decision making Many of us who have weathered harrowing residencies in surgery feel that after such experiences decision making is a natural extension of our selves While this is no doubt true correct decision making is something that many of us have yet to master The impetus to develop a text on evidence based decision making in thoracic surgery was stimulated by a conference for cardiothoracic surgical trainees developed in 2004 and sponsored by the American College of Chest Physicians During that conference it became clear that we as thoracic surgeons are operating from a very limited fund of true evidence based information What was also clear was the fact that many of the decisions we make in our everyday practices are not only uninformed by evidence based medicine but often are contradictory to existing guidelines or evidence based recommendations The objectives of this book are to explain the process of decision making both on the part of the physician and on the part of the patient and to discuss specific clinical problems in thoracic surgery and provide recommendations regarding their management using evidence based methodology Producing a text that will purportedly guide experienced practicing surgeons in the decision making process that they are accustomed to observe on a daily basis is a daunting task

Intelligent Medical Decision Support System Based on Imperfect Information Krzysztof Dyczkowski, 2017-10-01 This book discusses computer supported medical diagnosis with a particular focus on ovarian tumor diagnosis since ovarian cancer is difficult to diagnose and has high mortality rates especially in Central and Eastern Europe It presents the theoretical foundations both medical and mathematical of the intelligent OvaExpert system which supports decision making

in tumor diagnosis OvaExpert was created primarily to help gynecologists predict the malignancy of ovarian tumors by applying the existing diagnostic models and using modern methods of computational intelligence that accommodate imprecise and imperfect medical data both of which are common features of everyday medical practice The book presents novel methods based on interval valued fuzzy sets and the theory of their cardinalities Clinical Decision Making David M. Eddy,1996 Alice Morse Earle was a social historian of great note at the turn of the century and many of her books have lived on as well researched and well written texts of everyday life in Colonial America *Curious Punishments of Bygone Days* was published in 1896 It is a catalog of early American crimes and their penalties with chapters on the pillories stocks the scarlet letter the ducking stool discipline of authors and books egad and four other horrifying examples of ways in which those who transgressed the laws of Colonial America were made to pay for their sins *Medical Thinking* Steven Schwartz,Timothy Griffin,2012-12-06 Decision making is the physician s major activity Every day in doctors offices throughout the world patients describe their symptoms and com plaints while doctors perform examinations order tests and on the basis of these data decide what is wrong and what should be done Although the process may appear routine even to the physicians involved each step in the sequence requires skilled clinical judgment Physicians must decide which symptoms are important whether any laboratory tests should be done how the various items of clinical data should be combined and finally which of several treatments including doing nothing is indicated Although much of the information used in clinical decision making is objective the physician s values a belief that pain relief is more important than potential addiction to pain killing drugs for example and subjectivity are as much a part of the clinical process as the objective findings of laboratory tests In recent years both physicians and psychologists have come to realize that patient management decisions are not only subjective but also prob abilistic although this is not always acknowledged overtly When doc tors argue that an operation is fairly safe because it has a mortality rate of only 1 % they are at least implicitly admitting that the outcome of their decision is based on probability **"Code of Massachusetts regulations, 2002"** ,2002 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 The Massachusetts register ,1992-09-11 **Rational Diagnosis and Treatment** Peter Gøtzsche,2008-03-11 Now in its fourth edition *Rational Diagnosis and Treatment Evidence Based Clinical Decision Making* is a unique book to look at evidence based medicine and the difficulty of applying evidence from group studies to individual patients The book analyses the successive stages of the decision process and deals with topics such as the examination of the patient the reliability of clinical data the logic of diagnosis the fallacies of uncontrolled therapeutic experience and the need for randomised clinical trials and meta analyses It is the main theme of the book that whenever possible clinical decisions must be based on the evidence from clinical research but the authors also explain the pitfalls of such research and the problems involved in applying evidence from groups of patients to the individual patient For this new edition the sections on placebo and meta analysis and on alternative medicine

have been thoroughly updated and there is more focus on insufficient reporting of harms of interventions The sections on different research designs describe advantages and limitations and the increased medicalisation and the effects of cancer screening on health people are noted A section on academic freedom when clinicians collaborate with industry and ghost authors is added This essential reference work integrates the science and statistical approach of evidence based medicine with the art and humanism of medical practice distinguishing between data sets of data knowledge and wisdom and their application Such an intellectually challenging book is ideal for both medical students and doctors who require theoretical and practical clinical skills to help ensure that they apply theory in practice
