*Classical Imitation and Interpretation in Chaucer's Troilus* John V. Fleming, 1990      Imitations of the Self: Jiang Yan and Chinese Poetics Nicholas Morrow Williams, 2014-11-06 Imitations of the Self reevaluates the poetry of Jiang Yan 444 505 long underappreciated because of its pervasive reliance on allusion by emphasizing the self conscious artistry of imitation In context of imitation poetry the popular genre of the Six Dynasties era Jiang s work can be seen as the culmination of central trends in Six Dynasties poetry His own life experiences are encoded in his poetry through an array of literary impersonations reframed in traditional literary forms that imbue them with renewed significance A close reading of Jiang Yan s poetry demonstrates the need to apply models of interpretation to Chinese poetry that do justice to the multiplicity of authorial self representation      Interpretations of literature, by Lafcadio Hearn Lafcadio Hearn, 1915      *The Routledge Companion to Remix Studies* Eduardo Navas, Owen Gallagher, xtine burrough, 2025-03-27 The Routledge Companion to Remix Studies 2nd Edition comprises contemporary texts by key authors and artists who are active in the interdisciplinary field of remix studies As an organic international movement remix culture originated in the popular music culture of the 1970s and has since grown into a rich cultural activity encompassing numerous forms of media The act of recombining pre existing material continues to bring up pressing questions of authenticity reception authorship copyright and the techno politics of media activism especially with the emergence of artificial intelligence which relies on remix methods and principles for content production This book approaches remix studies from various angles including sections on history aesthetics ethics politics and practice and offers theoretical chapters alongside case studies of remix projects This second edition includes ten new chapters and nine revised chapters Reprinted chapters from the first edition are updated with editorial prefaces This volume offers in depth insight for long term relevance among the many interdisciplinary fields that rely on and also contribute to remix studies This companion is a valuable resource for both researchers and remix practitioners as well as a teaching tool for instructors using remix practices in the classroom      **Turntables and Tropes** Scott Haden Church, 2022-03-01 The creative practice of remix is essential to contemporary culture as the proliferation of song mashups political remix videos memes and even streaming television shows like Stranger Things demonstrates Yet remix is not an exclusively digital practice nor is it even a new one as there is evidence of remix in the speeches of classical Greek and Roman orators Turntables and Tropes is the first book to address remix from a communicative perspective examining its persuasive dimensions by locating its parallels with classical rhetoric Through identifying recontextualizing mashing up and applying rhetorical tropes to contemporary digital texts and practices this groundbreaking book presents a new critical vocabulary that scholars and students can use to analyze remix Building upon scholarship from classical thinkers such as Isocrates Quintilian N g rjuna and Cicero and contemporary luminaries like Kenneth Burke Richard Lanham and Eduardo Navas Scott Haden Church shows that an understanding of rhetoric offers innovative ways to make sense of remix culture      *Relics and*

*Writing in Late Medieval England* Robyn Malo, 2013-12-06 Relics and Writing in Late Medieval England uncovers a wide ranging medieval discourse that had an expansive influence on English literary traditions Drawing from Latin and vernacular hagiography miracle stories relic lists and architectural history this study demonstrates that as the shrines of England's major saints underwent dramatic changes from c 1100 to c 1538 relic discourse became important not only in constructing the meaning of objects that were often hidden but also for canonical authors like Chaucer and Malory in exploring the function of metaphor and of dissembling language Robyn Malo argues that relic discourse was employed in order to critique mainstream religious practice explore the consequences of rhetorical dissimulation and consider the effect on the socially disadvantaged of lavish expenditure on shrines The work thus uses the literary study of relics to address issues of clerical and lay cultures orthodoxy and heterodoxy and writing and reform

**Literature** Lafcadio Hearn,1915      **Approaching human intelligence through chemical systems: Development of unconventional chemical artificial intelligence** Pier Luigi Gentili,Konrad Szaciłowski,Andrew Adamatzky,2023-11-27

Although human intelligence is deeply investigated by neuroscientists psychologists philosophers and AI researchers we still lack of a widely accepted definition of what it is If we exploit the emergence theory from Complexity Science to give a definition we might state that human intelligence is the emergent property of the human nervous system Such fascinating emergent property allows us to handle both accurate and vague information by computing with numbers and words Moreover it allows us to reason speak and take rational decisions in an environment of uncertainty partiality and relativity of truth when the Incompatibility Principle holds As the complexity of a system increases accuracy and significance become almost mutually exclusive characteristics of our statements Finally our intelligence allows us recognizing quite easily variable patterns Therefore it is worthwhile investigating human intelligence and trying to mimic it by developing Artificial Intelligence Nowadays Artificial Intelligence is in vogue it is applied in both basic and applied science Traditionally there are two strategies to develop Artificial Intelligence A strategy consists in writing human like intelligent software running in von Neumann computers or special purpose hardware The other strategy consists in neuromorphic engineering Neuromorphic engineering implements surrogates of neurons through non biological systems either for neuro prosthesis or to design brain like computing machines A third strategy is now blooming and it consists in using molecular supramolecular materials and systems chemistry to mimic some basic functions of human intelligence such as Boolean multi valued logic gates and Fuzzy logic This third strategy is originating Chemical Artificial Intelligence CAI A relevant purpose of CAI is to design modules for Chemical Robots A Chemical Robot is thought of as a molecular assembly that reacts autonomously to its environment by probing it with molecular sensors making decisions by its intrinsic Artificial Neural Networks or logic gates and performing actions upon its environment through molecular effectors The intelligent activities of any Chemical Robot should be sustained energetically by a metabolic unit Chemical Robots should be easily miniaturized and implanted in living beings to interplay with cells or organelles for biomedical applications They should become auxiliary elements of the natural immune system      Great Soviet Encyclopedia Aleksandr Mikhailovich Prokhorov,1973      **The Theory of Poetry in England**

its compelling demonstration of the tensions between a Cressida defined by literary history and convention and a Cressida recast through perceptually limited narrators Offering Dido as a dynamic model for Cressida this book provides an extensive treatment of Boccaccio's Dido     **The Classical Weekly** ,1928     **University of Wisconsin Studies in Language and Literature** University of Wisconsin,1920     Classical Weekly ,1921     **Classical and Medieval Literary Criticism: Translations and Interpretations** Alex Preminger,Osborne Bennett Hardison (Jr.),Kevin Kerrane,1974     Elizabethan Criticism of Poetry ...
