The Rise of Metacreativity Eduardo Navas, 2022-11-18 This book brings together history and theory in art and media to examine the effects of artificial

intelligence and machine learning in culture and reflects on the implications of delegating parts of the creative process to AI In order to understand the complexity of authorship and originality in relation to creativity in contemporary times Navas combines historical and theoretical premises from different areas of research in the arts humanities and social sciences to provide a rich historical and theoretical context that critically reflects on and questions the implications of artificial intelligence and machine learning as an integral part of creative production As part of this the book considers how much of postproduction and remix aesthetics in art and media preceded the current rise of metacreativity in relation to artificial intelligence and machine learning and explores contemporary questions on aesthetics The book also provides a thorough evaluation of the creative application of systematic approaches to art and media production and how this in effect percolates across disciplines including art design communication as well as other fields in the humanities and social sciences An essential read for students and scholars interested in understanding the increasing role of AI and machine learning in contemporary art and media and their wider role in creative production across culture and society

How to Think about

Data Science Diego Miranda-Saavedra, 2022-12-23 This book is a timely and critical introduction for those interested in what data science is and isn't and how it should be applied The language is conversational and the content is accessible for readers without a quantitative or computational background but at the same time it is also a practical overview of the field for the more technical readers The overarching goal is to demystify the field and teach the reader how to develop an analytical mindset instead of following recipes The book takes the scientist's approach of focusing on asking the right question at every step as this is the single most important factor contributing to the success of a data science project Upon finishing this book the reader should be asking more questions than I have answered This book is therefore a practising scientist's approach to explaining data science through questions and examples

Assembling Tomorrow Scott

Doorley, Carissa Carter, Stanford d.school, 2024-06-18 A powerful guide to why even the most well intentioned innovations go haywire and the surprising ways we can change course to create a more positive future by two celebrated experts working at the intersection of design technology and learning at Stanford University's acclaimed d.school This brilliant book offers a new approach to all creative work that will expand your understanding of what it means to make and open up possibilities you didn't know existed it did for me Adam Johnson Pulitzer Prize winning author of *The Orphan Master's Son* In *Assembling Tomorrow* authors Scott Doorley and Carissa Carter explore the intangible forces that prevent us from anticipating just how fantastically technology can get out of control and what might be in store for us if we don't start using new tools and tactics Despite our best intentions our most transformative innovations tend to have consequences we can't always predict From the effects of social media to the uncertainty of AI and the consequences of climate change the outcomes of our creations ripple across our lives Time and again our seemingly ceaseless capacity to create rubs up against our limited capacity to understand our impact *Assembling Tomorrow* explores how to use readily accessible tools to both mend the mistakes of our

past and shape our future for the better We live in an era of runaway design where innovations tangle with our lives in unpredictable ways This book explores the off kilter feelings of today and follows up with actionables to alter your perspective and help you find opportunities in these turbulent times Mixed throughout are histories of the future short pieces of speculative fiction that imagine the future as if it has already happened and consider the past with a critical yet hopeful eye so that all of us as designers of our own futures can create a better world for generations to come **New Scientist and Science Journal** ,2007 **The American Interest** ,2008-03 **Dr. Dobb's Journal** ,2007 *Thriving on Overload:*
