Soft Skills for Kids Nancy Armstrong Melser, 2022-05-11 Children today are going through a lot. They are busy with school, involved in extracurricular activities, and trying to navigate the world of COVID and other concerns. Teachers and parents are busy too with work, school, and parenting activities. How will they have the time to teach valuable skills such as manners and respect to children? These are soft skills, the skills necessary to work with others and be a respected and valuable citizen in the workplace of tomorrow. Soft Skills for Kids In Schools at Home and Online 2nd Edition focuses on ways that teachers and parents can work together to teach soft skills to the children in their lives. This book is not a curriculum program or set of lessons to help children, but rather a series of teachable moments in which adults teach strategies to children as they happen. Finally, as the education of children has changed recently due to the pandemic with an increased number of children learning online, this book will be a great resource for how adults can work together to help children learn soft skills in schools at home and online.

Trust in Virtual Teams Thomas P. Wise, 2016-02-17 As projects become more complex and the project teams are more geographically and culturally dispersed, so strong trusting relationships come to the fore. Trust provides the security that enables project teams to work together effectively even when they face project threatening problems and challenges. Because today's team members work virtually as much by choice as by geographic necessity, business leaders must understand how team relationships such as trust cross divisional projects and how offshore team participation are all positively motivated by a solid quality assurance program. Offering real world solutions, Trust in Virtual Teams provides a clear view of how virtual projects can succeed and how quality assurance compliments and promotes effective organizational design and project management to build solid trust relationships. Dr. Wise combines the latest research in virtual team trust with simple and proven quality methods. He builds upon more than 20 years of experience in quality and project work to guide team managers in creating high performing project teams. Our understanding of the role human factors play in project performance and project resilience continues to grow. As it does so, does our need to address the behaviors and culture that enable good performance. Tom Wise's book is a thoughtful and pragmatic guide to help project teams and managers do just that.

Women and Girls in STEM Fields Heather Burns Page, 2024-09-19 Written by a respected science educator and advocate for women and girls in STEM fields, this one stop resource provides a rich overview of efforts to provide women and girls with greater access to educational and career opportunities in traditionally male dominated STEM fields. Since the passage of Title IX, the numbers of American women working in STEM fields have increased, particularly in the social and biological sciences. Nonetheless, women continue to be

underrepresented in STEM disciplines accounting for less than a third of the current STEM workforce When the intersection of sociocultural factors such as race ethnicity and socioeconomic background are examined alongside gender some demographic groups of women continue to lag in terms of representation in all STEM fields The reasons cited for this continued state of affairs remain hotly debated even as efforts intensify to break down longstanding gender barriers and bring women and girls into the worlds of science technology engineering and mathematics Women and Girls in STEM Fields provides wide ranging complementary coverage of every aspect of the issue from the historical barriers that confronted generations of American women and girls interested in pursuing careers in various STEM disciplines to the laws and movements that dismantle some of those obstacles Features include smartly organized chapters on major trends issues debates and historical moments carefully selected profiles of the key organizations and individuals that have shaped discussions of this subject in Washington D C and across the USA a suite of original essays from educators scholars and women writing about their firsthand experiences in today s STEM world *Promoting Motor Development in Children in the COVID-19 era: Science and Applications* Guido Guido Fumagalli,Nancy Getchell,Arja Sääkslahti,Patrizia Tortella,2022-11-07
