Marlee S. Bunch, Brittany R. Collins, 2025-07-22 *Leveraging AI for Human-Centered Learning* provides intentional approaches to the integration of artificial intelligence tools into middle and high school classrooms, specifically to foster equity and social-emotional wellbeing. The overlap of AI with today's schools poses pivotal questions about ethics, morality, inclusion, and human learning at a time when students are already reckoning with public health crises, systemic injustice, and other connected challenges. This book helps teachers examine the pros and cons of artificial intelligence as used by both educators and students, as well as its implications for meaningful, culturally responsive teaching and social-emotional learning efforts. Featuring activities, lesson plans, and discussion and writing prompts for use with adolescent learners, each chapter offers concrete pedagogical approaches and instructional innovations that align technological changes with learning objectives in ways that advance rather than replace or neutralize attention to equity and wellbeing. [ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING AND MARKETING MANAGEMENT](#)

James Seligman, 2018-09-20 **OBJECTIVES** The book's objectives provide a full delivery of information on the fields of artificial intelligence (AI) and machine learning (ML) to educators, students, and practitioners of marketing. By explaining AI and ML terminology and its applications, including marketing, the book is designed to inform and educate. Marketing use of AI and ML has exploded in recent decades as marketers have seen the considerable benefits of these two technologies. It is understood and explained that AI deals with intelligent behaviour by machines rather than natural intelligence found in humans and animals; it is the machine mimicking cognitive functions that humans associate with the mind in learning, expression, and problem-solving, and much more. *Serious Games*
