Singular Creatures Mark Kingwell, 2022-10-15 Anxiety about non-human intelligent machines is a longstanding theme of cultural production and consumption. Examples range from tales of golems and Frankenstein's monster to the evil overlord scenarios of contemporary film and television franchises like *Star Trek*.

the Alien series and the Terminator sequence as well as Her Black Mirror Blade Runner Ex Machina and many other less mainstream cultural artifacts The source of this anxiety is clear Non human conscious entities may turn out to be superior to any biological form of life allowing a stride across human ambition in a moment dubbed the Singularity by AI insiders This is the turning point when non human entities advance and reproduce in a manner that surpasses and subjugates biological forms of intelligent life Although today s artificial intelligences fall notably short of this level of sophistication Mark Kingwell argues that we are already more than human in important ways and likely to become more so as time goes on In Singular Creatures Kingwell plumbs the depths of cultural and political meaning in the apparent transition to posthuman life Our immersion in technology now comprehensive to the point of invisibility has altered forever what it means to be alive The politics of posthumanism flow directly from our own situation at once dependent on technology and afraid of its effects on current and future experiences More than a century after playwright Karel apek coined the word robot rooted in the Czech robota meaning servitude or drudgery in his 1920 allegory about the alienation of forced labour leading to a violent workers revolt apek s central question continues to haunt us Can humans and their own creations co exist in a new cyberflesh world or is a struggle for superiority inevitable Singular Creatures is an attempt at sketching the field before any deadly battle is joined
