Class Practices How Parents Help Their Children Get Good Jobs:

Class Practices Fiona Devine, 2004-04-29 This important new book is a comparative study of social mobility based on qualitative interviews with middle class parents in America and Britain It addresses the key issue in stratification research namely the stability of class relations and middle class reproduction Drawing on interviewee accounts of how parents mobilised economic cultural and social resources to help them into professional careers it then considers how the interviewees as parents seek to increase their children s chances of educational success and occupational advancement Middle class parents may try to secure their children s social position but it is not an easy or straightforward affair With the decline of the quality of state education and increased job insecurity in the labour market since the 1970s and 1980s the reproduction of advantage is more difficult than in the affluent decades of the 1950s and 1960s The implications for public policy especially public investment in higher education are considered International Handbook of Migration, Minorities and Education Zvi Bekerman, Thomas Geisen, 2011-10-06 Migrants and minorities are always at risk of being caught in essentialized cultural definitions and being denied the right to express their cultural preferences because they are perceived as threats to social cohesion Migrants and minorities respond to these difficulties in multiple ways as active agents in the pedagogical political social and scientific processes that position them in this or that cultural sphere On the one hand they reject ascribed cultural attributes while striving towards integration in a variety of social spheres e g school and workplace in order to achieve social mobility On the other hand they articulate demands for cultural self determination This discursive duality is met with suspicion by the majority culture For societies with high levels of migration or with substantial minority cultures questions related to the meaning of cultural heterogeneity and the social and cultural limits of learning and communication e g migration education or critical multiculturalism are very important It is precisely here where the chances for new beginnings and new trials become of great importance for educational theorizing which urgently needs to find answers to current questions about individual freedom community cultural affiliations and social and democratic cohesion Answers to these questions must account for both political and learning perspectives at the macro mezzo and micro contextual levels The contributions of this edited volume enhance the knowledge in the field of migrant minority education with a special emphasis on the meaning of culture and social learning for educational processes Working with Parents, Carers and Families in the Early Years Teresa Wilson, 2024-12-23 Parents have a crucial role in supporting children s learning development and wellbeing Forming effective partnerships with families and carers is a key feature of the Early Years Foundation Stage Achieving this takes time reflective practice skill and a solid understanding of the barriers that can impede forming effective working relationships with parents Working with Parents Carers and Families in the Early Years offers an informed and comprehensive framework for working with parents drawing on the latest evidence and containing practical advice from practitioners and parents to support sound partnership practice This second edition has been fully

Social Class and

Transnational Human Capital Jürgen Gerhards, Hans Silke, Sören Carlson, 2017-06-26 Due to globalization processes foreign language skills knowledge about other countries and intercultural competences have increasingly become important for societies and people's social positions Previous research on social inequality however has dominantly focused on the reproduction of class structures within the boundaries of a particular nation state without considering the importance of these specific skills and competences Within *Social Class and Transnational Human Capital* authors Gerhards Hans and Carlson refer to these skills as transnational human capital and ask to what extent access to this increasingly sought after resource depends on social class Based on Pierre Bourdieu's theory of class they investigate this question via both quantitative and qualitative empirical analyses In doing so the authors focus among other examples on the so called school year abroad i.e. students spending up to a year abroad while attending school a practice which is rather popular in Germany but also quite common in many other countries Thus this insightful volume explores how inequalities in the acquisition of transnational human capital and new forms of social distinction are produced within families depending on their class position and the educational strategies parents pursue when trying to prepare their children for a globalizing world An enlightening title this book will appeal to undergraduate and postgraduate students as well as postdoctoral researchers interested in fields such as sociology social inequality research globalization studies and educational studies **Very**

Different, But Much the Same W. G. Runciman, 2014-11-13 *Very Different but Much the Same* takes as its starting point the distribution of political ideological and economic power between English society's constituent roles from the time when Daniel Defoe was writing *Robinson Crusoe* and argues that Defoe would find it remarkably similar three centuries later despite all the changes in technology lifestyles amenities beliefs attitudes norms and values by which he would no doubt be astonished The disjunction between the two is explained by bringing to bear the approach of current evolutionary sociological theory in which the reproduction or extinction of a society's institutional practices is traced to selective environmental pressures which are independent of the personal motives and subjective experiences of the individuals whose practices they are It is further argued that the rates of high absolute and low relative social mobility that sociologists have documented in detail for the twentieth century are likely to have been much the same during the eighteenth and nineteenth centuries The conclusion drawn is that for as long as the country was not defeated in a European war the probability of a radical change in institutional distribution of power was extremely low throughout however much contemporary observers or later historians would have either welcomed or deplored it *Forthcoming Books* Rose Arny, 2003-12 **Social Inequality**

in Australia Daphne Habibis, Maggie Walter, 2009 *Social Inequality Australia at the Crossroads* provides comprehensive coverage of the key dimensions of the nature and extent of inequality and difference in Australian society Incorporating debates about the effects of globalization on inequality and difference in Australia it also considers the role of culture in the social reproduction of hierarchy and difference Arguments about the nature of inequality are tested against empirical
