Classical and New Paradigms of Computation and Their Complexity Hierarchies Benedikt Lowe, Boris Piwinger, Thoralf Rasch, 2014-09-01 Classical and New Paradigms of Computation and their Complexity Hierarchies Benedikt Löwe, Boris Piwinger, Thoralf Räscher, 2007-11-04 The notion of complexity is an important contribution of logic to theoretical computer science and mathematics This volume attempts to approach complexity in a holistic way investigating mathematical properties of complexity hierarchies at the same time as discussing algorithms and computational properties A main focus of the volume is on some of the new paradigms of computation among them Quantum Computing and Infinitary Computation The papers in the volume are tied together by an introductory article describing abstract properties of complexity hierarchies This volume will be of great interest to both mathematical logicians and theoretical computer scientists providing them with new insights into the various views of complexity and thus shedding new light on their own research

Mathematical Foundations of Computer Science 2005 Joanna Jedrzejowicz, Andrzej Szepietowski, 2005-09-14 This volume contains the papers presented at the 30th Symposium on Mathematical Foundations of Computer Science MFCS 2005 held in Gdansk Poland from August 29th to September 2nd 2005 *Ordinal Computability* Merlin Carl, 2019-09-23 Ordinal Computability discusses models of computation obtained by generalizing classical models such as Turing machines or register machines to transfinite working time and space In particular recognizability randomness and applications to other areas of mathematics are covered

A Primer on Quantum Computing Franklin de Lima Marquezino, Renato Portugal, Carlile Lavor, 2019-06-25 This book is about quantum computing and quantum algorithms The book starts with a chapter introducing the basic rules of quantum mechanics and how they can be used to build quantum circuits and perform computations Further Grover's algorithm is presented for unstructured search discussing its consequences and applications Next important techniques are discussed such as Quantum Fourier Transform and quantum phase estimation Finally Shor's algorithm for integer factorization is explained At last quantum walks are explained in detail covering both the discrete and continuous time models and applications of this techniques are described for the design and analyses of quantum algorithms

Quantum Artificial Intelligence Vijayarangan Natarajan, 2025-09-07 This book presents the result of an innovative challenge to create a systematic literature overview driven by machine generated content Questions and related keywords were prepared for the machine to query discover collate and structure by Artificial Intelligence AI clustering The AI based approach seemed especially suitable to provide an innovative perspective as the topics are indeed both complex interdisciplinary and multidisciplinary for example climate planetary and evolution sciences Springer Nature has published much on these topics in its journals over the years so the challenge was for the machine to identify the most relevant content and present it in a structured way that the reader would find useful The automatically generated literature summaries in this book are intended as a springboard to further discoverability They are particularly useful to readers with limited time looking to learn more about the subject quickly and especially if they are new to the topics Springer Nature seeks to support anyone who needs a fast and effective start in their content discovery journey from the undergraduate student exploring interdisciplinary content to Master or PhD thesis developing research questions to the practitioner seeking support materials this book can serve as an inspiration to name a few examples It is important to us as a publisher to make the advances in technology easily accessible to our authors and find new ways of AI based author services that allow human machine interaction to generate readable usable collated research content
