Novokhatko,2024-12-02 Readers of this book receive an overview of the main perspectives and research of recent decades in the fruitful collaboration between Classics and Cognitive studies It is intended as a stocktaking of various branches of Classics such as literary criticism and poetics linguistics ancient history and archaeology Four major research areas or clusters have been chosen for the presentation of the chapters Chapter one discusses recent studies of cognitive materiality and material agency in relation to the human mind chapter two the so called spatial turn and cognition and the perception of space in place in relation to antiquity chapter three imagination and vision and cognitive approaches to seeing while chapter four considers experience and experientiality and the sensory turn as applied to ancient sources Finally the fifth chapter is a special case and a different medium it consists of three interviews with three well known pioneers of the study of emotions in antiquity David Konstan Angelos Chaniotis and Douglas Cairns who in various direct and indirect ways have greatly influenced the interplay and dialogue between classical studies and cognitive approaches in recent decades This book takes stock of a rapidly developing and highly controversial field that is currently in full bloom **Toward a Cognitive Classical Linguistics** Egle Mocciaro,William Michael

Giannakis, Panagiotis Filos, Emilio Crespo Güemes, Jesús de la Villa, 2023-10-24 There is a long standing debate over the relation of historical linguistics and classical philology especially within the purview of the renewed interest in it during the last decades and the recent trends that characterize philological and linguistic studies Ever since its appearance in the nineteenth century the history of this debate testifies to a turbulent coexistence and fertile collaboration of the two disciplines but at times also moving along centrifugal paths The essays in this volume address this debate and cover various aspects of linguistic and philological research of Greek and Latin moving in the middle ground where language linguistics and philology crosscut and cross fertilize each other highlighting the application of linguistic theory to the study of classical texts and drawing on fields such as syntactic theory and pragmatics historical semantics and the lexicon reconstruction and etymology dialectology editorial practices the use of corpora and other interdisciplinary approaches that function as hinges between philology and linguistics **Yale '86 Class Book** Yale University. Essays in the History of Linguistic Anthropology Dell H. Hymes, 1983 Anthropology and linguistics as historically developing disciplines have had partly separate roots and traditions In particular settings and in general the two disciplines have partly shared partly differed in the nature of their materials their favorite types of problem the personalities of their dominant figures their relations with other disciplines and intellectual current The two disciplines have also varied in their interrelation with each other and the society about them Institutional arrangements have reflected the varying degrees of kinship kithship and separation Such relationships themselves form a topic that is central to a history of linguistic anthropology yet marginal to a self contained history of linguistics or anthropology as either would be conceived by most authors There exists not only a subject matter for a history of linguistic anthropology but also a definite need *Classics of Semiotics* Martin Krampen, Klaus Oehler, Roland Posner, Thomas A. Sebeok, Thure von Uexküll, 2013-06-29 This book is designed to usher the reader into the realm of semiotic studies It analyzes the most important approaches to semiotics as they have developed over the last hundred years out of philosophy linguistics psychology and biology As a science of sign processes semiotics investigates all types of communication and information exchange among human beings animals plants internal systems of organisms and machines Thus it encompasses most of the subject areas of the arts and the social sciences as well as those of biology and medicine Semiotic inquiry into the conditions functions and structures of sign processes is older than any scientific discipline As a result it is able to make the underlying unity of these disciplines apparent once again without impairing their function as specializations Semiotics is above all research into the theoretical foundations of sign oriented disciplines that is it is General Semiotics Under the name of Zeichenlehre it has been pursued in the German speaking countries since the age of the Enlightenment During the nineteenth century the systematic inquiry into the functioning of signs was superseded by historical investigations into the origins of signs This opposition was overcome in the first half of the twentieth century by American Semiotics as well as by various directions of European structuralism working in the tradition of Semiology Present day General Semiotics builds on all these developments APA Guide to Graduate Programs in the Classics in the United States and Canada, 1993 **Proceedings of the ...
