Artificial Intelligence and Playable Media Eric Freedman, 2022-09-02 This book introduces readers to artificial intelligence (AI) through the lens of playable media and explores the impact of such software on everyday life. From video games to robotic companions to digital twins, artificial intelligence drives large sectors of the culture industry where play, media, and machine learning coexist. This book illustrates how playable media contribute to our sense of self while also harnessing our data, tightening our bonds with computation, and realigning play with the demands of network logic. Author Eric Freedman examines a number of popular media forms from the Sony AIBO robotic dog, video game developer Naughty Dog's Uncharted, and The Last of Us franchises to Peloton's connected fitness equipment to lay bare the computational processes that undergird playable media and addresses the social, cultural, technological, and economic forces that continue to shape user-centered experience and design. The case studies are drawn from a number of related research fields including science and technology studies, media studies, and software studies. This book is ideal for media studies students, scholars, and practitioners interested in understanding how applied artificial intelligence works in popular public and visual culture.

AI-Enabled Multiple-Criteria Decision-Making Approaches for Healthcare Management Kautish, Sandeep Kumar, Dhiman, Gaurav, 2022-06-30 Multiple criteria decision making, including multiple rule-based decision making, multiple objective decision making, and multiple attribute decision making, is used by clinical decision makers to analyze healthcare issues from various perspectives. In practical healthcare cases, semi-structured and unstructured decision-making issues involve multiple criteria that may conflict with each other.
