AI Applications and Strategies in Teacher Education Keeley, Krista LaRue, 2024-10-10 Artificial intelligence is revolutionizing teacher education by offering innovative applications and strategies to enhance the learning experience for educators and students. From personalized learning platforms to intelligent tutoring systems, AI can transform traditional teaching methods. These intelligent technologies streamline administrative tasks while supporting the development of essential skills like critical thinking and faculty collaboration. As teacher education programs continue to integrate AI tools, future educators learn to harness data-driven insights and create engaging, effective learning environments. Exploring these applications further emphasizes the potential of AI to positively reshape the teacher education sphere. *AI Applications and Strategies in Teacher Education* explores the landscape of AI in training and supporting educators. The book serves educators seeking insights into effective utilization of AI in a professional setting and the integration of AI in teaching practices. This book covers topics such as educational technologies, higher education, and diversity and equity, and is a useful resource for academicians, teachers, professors, education professionals, data scientists, computer engineers, and researchers.

*Proceedings of the 4th International Conference on Internet, Education and Information Technology (IEIT 2024)* Yongjun Feng, Aniruddha Bhattacharjya, Junfeng Diao, Nahed Rajaa Ghulamallah, 2024-11-20 This is an open access book. With the development of science and technology, information technology and information resources should be actively developed and fully applied in all fields of education and teaching so as to promote the modernization of education and cultivate talents to meet the needs of society. From the technical point of view, the basic characteristics of educational informatization are digitalization, networking, intelligentization, and multi-media. From the perspective of education, the basic characteristics of educational information are openness, sharing, interaction, and cooperation. With the advantage of the network, it can provide students with a large amount of information and knowledge by combining different knowledge and information from various aspects in a high frequency. Therefore, we have intensified efforts to reform the traditional teaching methods and set up a new teaching concept from the interaction between teachers and students in the past to the sharing between students. In short, it forms a sharing learning mode. For all students, strive to achieve students' learning independence, initiative, and creativity. To sum up, we will provide a quick exchange platform between education and information technology so that more scholars in related fields can share and exchange new ideas. The 4th International Conference on Internet Education and Information Technology (IEIT 2024) will be held on May 17-19, 2024, in Kunming, China. IEIT 2023 is to bring together innovative academics and industrial experts in the field of Internet Education and Information Technology to a common forum. The primary goal of the conference is to promote research and developmental activities in Internet Education and Information Technology, and another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working all around the world. The conference will be held every year to make it an ideal platform for people to

share views and experiences in international conference on Internet Education and Information Technology and related areas
