## **Cali Colombia Toward A City Development Strategy:**

*Cali, Colombia* ,2002-01-01 Annotation The aim of this report is to summarize the analytical work carried out as part of the City Development Strategy CDS process and to put forth for further discussion an initial set of recommendations to help the city recover from its present crisis **Cali, Colombia** ,2002 Managing the City Economy Le-Yin Zhang,2015-03-24 In a world increasingly organised as networks of cities this book offers the first full length treatment of the subject of managing the city economy It explores key challenges and strategies particularly in developing countries where developmental deficits are greatest and almost all urban growth up to 2050 will take place Adopting a practitioner s perspective theoretically grounded and international in scope this book is unique in its focus and endeavours to connect theory with practice Through an interdisciplinary and strategic approach this book explores the challenges and options in managing the contemporary city economy It aims to illustrate the extent to which appropriate policy interventions in the city economy could offer effective solutions to some of the most difficult social and environmental challenges facing cities The book comprises five main parts Part I sets the scene and examines contemporary processes that affect cities and explains the challenges they pose for city managers Part II presents a selection of conceptual frameworks commonly used in urban economic analysis Part III examines the management of sectoral growth covering manufacturing exports of services transport and logistics and real estate Part IV addresses urban poverty low carbon transition and the informal economy Part V focuses on laying the foundation for long term city development exploring the roles of city development strategies municipal finance investment in people and appropriate infrastructure This book is designed for graduate courses in urban economic development urban planning urban policy and public administration and for professionals who are involved in the management of city economies or and conducting research consultancy or policy advocacy for cities Through critical review of relevant debates and a dozen case studies this book will equip city managers with the knowledge required to strengthen the performance of their city economy while delivering authentic and sustainable development **A Guide to the World Bank** ,2003 The World Bank Group works in more than 100 developing economies and is one of the world s largest sources of development assistance In 2002 the institution provided US 19 5 billion in loans to its client countries This guide reviews the organisation s history objectives and operations and looks at the five institutions that make up the World Bank Group the International Bank for Reconstruction and Development IBRD the International Development Association IDA the International Finance Corporation IFC the Multilateral Investment Guarantee Agency MIGA and the International Centre for Settlement of Investment Disputes ICSID *Analyzing Urban Poverty* Judy Baker,2004 In recent years an extensive body of literature has emerged on the definition measurement and analysis of poverty Much of this literature focuses on analyzing poverty at the national level or spatial disaggregation by general categories of urban or rural areas with adjustments made for regional price differentials Yet for an individual city attempting to tackle the problems of urban poverty this level of

aggregation is not sufficient for answering specific questions such as where the poor are located in the city whether there are differences between poor areas if access to services varies by subgroup whether specific programs are reaching the poorest and how to design effective poverty reduction programs and policies Answering these questions is critical particularly for large sprawling cities with highly diverse populations and growing problems of urban poverty Understanding urban poverty presents a set of issues distinct from general poverty analysis and thus may require additional tools and techniques Baker and Schuler summarize the main issues in conducting urban poverty analysis with a focus on presenting a sample of case studies from urban areas that were implemented by a number of different agencies using a range of analytical approaches for studying urban poverty Specific conclusions regarding design and analysis data timing cost and implementation issues are discussed This paper a product of the Urban Unit Transport and Urban Development Department is part of a larger effort in the department to promote strategies for reducing urban poverty World Bank web site **Using Rapid City Surveys to Inform Municipal Social Policy** Jesko Hentschel, 2004 Many developing countries assign local governments increasing responsibilities in fighting poverty This requires local social policy to go beyond the execution of centrally designed and funded education and health programs Hence local governments and their partners have both an opportunity and a need to analyze key local bottlenecks for poverty reduction and social development Drawing on an example from Cali Colombia Hentschel describes a tool for such policy formulation at the local level a rapid city household survey Although the survey uses pre coded and closed ended questions it is contextual in the sense that it is tailor made to social and economic conditions in Cali The survey places particular emphasis on collecting key quantitative information such as household welfare and service access as well as qualitative information such as service evaluations and population priorities Combining the quantitative and qualitative data allows for example the mapping of population budget priorities or service satisfaction levels by welfare group Rapid city household surveys could provide an important tool for the development of local social policies This paper a joint product of the Human Development Sector Unit and the Finance Private Sector and Infrastructure Unit Latin America and the Caribbean Region is part of a larger effort in the region to support local and municipal governments in the formulation of social policies World Bank web site Environment and Planning, 2007

*Making the Property Tax Work* Roy W. Bahl, Jorge Martinez-Vazquez, Joan M. Youngman, 2008 Students of public finance and fiscal decentralization in developing and transitional countries have long argued for more intensive use of the property tax It would seem the ideal choice for financing local government services Based on a Lincoln Institute conference held in October 2006 the chapters in this book take this argument one step further in drawing on recent experience with property tax policy and administration Two main sets of issues are addressed First why hasn't the property tax worked well in most developing and transitional countries Second what can be done to make the property tax a more relevant source for local governments in those countries The numerous advantages of the property tax as a local government revenue source are

analyzed and discussed in detail as are the many perceived disadvantages World Bank Research Program World Bank,2002 **Fiscal Reform in Colombia** Richard Miller Bird,James M. Poterba,Joel Slemrod,2005 Essays coauthored by Colombian and North American tax experts analyze ways to achieve long term sustainable fiscal policy and a more efficient tax system Colombia once a model of fiscal discipline for other Latin American nations has seen its fiscal situation deteriorate since the early 1990s Higher government spending taxes that did not keep pace with expenditures and severe recession led to an unsustainable debt to GDP ratio of 52 percent in 2002 Short term tax increases even coupled with spending reforms have not restored Colombia to fiscal balance A Colombian government commission charged with researching more long term tax and fiscal reforms gave rise to the selected essays included in this book each coauthored by Colombian and North American public finance experts The analyses and recommendations have particular policy relevance for developing economies in general The studies include both broad discussions of Colombian fiscal and tax systems and detailed analyses of such specific tax instruments as the payroll tax value added tax and the bank debit tax The focus is on three key concerns the sustainability of Colombia s fiscal situation possible reforms to the national tax system and the fiscal relationship between the national and subnational governments The theme that emerges from these studies the importance of moving toward a more efficient and equitable tax system while also raising revenue suggests the limitations of stopgap measures and the real need for long term fiscal reform Books in Print Supplement ,2002 Bibliographie Mensuelle United Nations Library (Geneva, Switzerland),2002 A Sourcebook for Poverty Reduction Strategies: Macroeconomic and sectoral approaches Jeni Klugman,2002 **American Book Publishing Record** ,2002 *Urbanization: Development Policies and Planning* United Nations.
