Tragic Investment R. James Addington, 2019-06-01 America's investment in race and racial oppression was central to its early years as a nation a theme that dates back to Europe's earliest colonial efforts in the Western Hemisphere Some of the contemporary consequences for communities of color are clear Numerous studies routinely quantify racial disparities in virtually every social arena But are there negative consequences of this historical investment for white people R James Addington explores that weighty topic while seeking to answer questions such as How do we repair the damage done to communities as a result of our racial history Is racial oppression related to our ability to respond to ecological challenges Does our investment in racial oppression jeopardize our nation's future Addington suggests that racism harms us all and he pays particular attention to the subtle ways white people are damaged He also suggests that race sabotages the nation's capacity to negotiate the challenges the future poses Explore how overcoming racism and shaping a sustainable resilient society are bound together in *Tragic Investment*

Presidential Power in Latin America Dan Berbecel, 2021-12-23 What explains variance in presidential power between countries In *Presidential Power in Latin America* Dan Berbecel provides a general systematic theory for explaining presidential power in practice as opposed to presidential power in theory Using expert survey data from *Varieties of Democracy V Dem* alongside interviews with high level figures in politics the judiciary the public administration NGOs and academia in Argentina and Chile Berbecel argues that constitutional presidential power formal power is a very poor predictor of presidential power in practice informal power Given the poor predictive value of formal rules he provides an explanation why hyperpresidentialism emerges in some countries but not in others Berbecel attributes the root causes of hyperpresidentialism to three independent variables the strength of state institutions the size of the president's party in congress and whether or not the country has a history of economic crises which together determine how likely it is that a president will be able to concentrate power *Presidential Power in Latin America* will be of key interest to scholars and students of executive politics Latin American politics and more broadly comparative politics
