Business Research Realities Selected Readings:

Business Research Realities David A. Erekson, Steven H. Shaha, Craig D. Swenson, 1996 **Consumer Packaging Strategy** Huda Khan, Richard Lee, Polymeros Chrysochou, 2022-08-18 The consumer packaged goods CPG industry is dominated by major Western brands The dominance of such major brands extends to burgeoning Asian markets These conglomerates often rely on packaging as a strategic tool to entice Asian consumers This book illustrates how packaging as a marketing tool is more than simply changing the label or translating the brand into vernacular language It examines how different packaging elements e g information imagery packaging type can help to communicate product values to Asian consumers Drawing upon rich knowledge of the Asian CPG markets with extensive findings from fieldworks in the key Asian markets this book explains how Western brands are localising their packaging design in Asian markets It provides invaluable insight into how major Western CPG brands have relied heavily on their packaging strategies to compete not only against domestic brands but also against other foreign brands The book includes in depth interviews with brand managers of several major Western CPG brands and retailers and sheds light on emerging trends of CPG packaging in Asia **Cross-Cultural Management** David C. Thomas, Kerr Inkson, 2021-01-20 We are reminded daily of the globally interconnected business world in which we live Events on one side of the globe reverberate instantaneously in the other Globalization has many effects but one of the most important is the dramatic increase in the opportunity and need to interact with people who are culturally different from us We are exposed on a daily basis to a wide variety of attitudes values beliefs and assumptions that culturally different individuals hold about appropriate behavior In order to thrive and in some cases even to survive as managers we must learn to understand and integrate these differences David Thomas and Kerr Inkson offer students an authoritative yet approachable perspective in Introduction to Cross Cultural Management 1st Edition Language Management Natalie Victoria Wilmot, 2022-08-12 This book draws on case studies of language management within British organisations to examine the decisions they make about language diversity in their professional communications in order to be successful in a multilingual world It explores the practices that the organisations use to manage language diversity in interorganisational relationships and why certain practices occur in some situations and not others The book highlights how organisations rely on individual employees to perform a variety of language tasks and the implications of this the effect of English as a global lingua franca and the translation challenges which organisations face The book demonstrates that practices to manage language diversity are often a result of the resources organisations have at given moments in time rather than being part of a deliberate language management strategy **The Routledge Handbook of Translation and Cognition** Fabio Alves, Arnt Jakobsen, 2020-05-31 The Routledge Handbook of Translation and Cognition provides a comprehensive state of the art overview of how translation and cognition relate to each other discussing the most important issues in the fledgling sub discipline of Cognitive Translation Studies CTS from foundational to applied aspects With a strong focus on interdisciplinarity

the handbook surveys concepts and methods in neighbouring disciplines that are concerned with cognition and how they relate to translational activity from a cognitive perspective Looking at different types of cognitive processes this volume also ventures into emergent areas such as neuroscience artificial intelligence cognitive ergonomics and human computer interaction With an editors introduction and 30 chapters authored by leading scholars in the field of Cognitive Translation Studies this handbook is the essential reference and resource for students and researchers of translation and cognition and will also be of interest to those working in bilingualism second language acquisition and related areas
