Measuring the Business Value of Information Technology David S. Sward, 2006 Measuring the Business Value of Information Technology deals with computers software **The Business Value of Software** Michael D. S. Harris, 2017-09-01 In business driving value is a key strategy and typically starts at the top of an organization In today's digital age driving software value is also an important and often overlooked key strategy Executives and the corporate board need to expect the highest level of business value from the software the organization is developing buying and selling In today's digital transformation marketplace it is imperative that organizations start driving business value from software development initiatives For many years the cost of software development challenged organizations with questions such as How do we allocate software development costs Should these costs be considered an overhead expense Are we getting the most value possible for our investment A fundamental problem has been built into these questions the focus on cost In almost every other part of the organization maximizing profit or in the case of a not for profit maximizing the funds available provides a clear focus with metrics to determine success or failure In theory simply aligning software spending with the maximizing profit goals should be sufficient to avoid any questions about value for money Unfortunately this alignment hasn't turned out to be so simple and the questions persist particularly at the strategic or application portfolio level In this book Michael D S Harris describes how a software business value culture one where all stakeholders including technology and business have a clear understanding of the goals and expected business value from software development The book shows readers how they can transform software development from a cost or profit center to a business value center Only a culture of software as a value center enables an organization to constantly maximize business value flow through software development If your organization is starting to ask how it can change software from a cost center to a value center this book is for you *Global Perspectives in Marketing for the 21st Century* Ajay K. Manrai, H. Lee Meadow, 2015-06-09 This volume includes the full proceedings from the 1999 World Marketing Congress held in Qawra Malta with the theme Global Perspectives in Marketing for the 21st Century The focus of the conference and the enclosed papers is on marketing thought and practices from a global perspective This volume resents papers on various topics including marketing management
