Cavana,2018-04-24 This book is a printed edition of the Special Issue Systems Education for a Sustainable Planet that was published in Systems A Semi-Structural Model for Credit Cycle and Policy Analysis - An Application for Luxembourg Carlos de Resende,Alexandra Solovyeva,Moez Souissi,2024-07-09 The paper explores the nexus between the financial and business cycles in a semi structural New Keynesian model with a financial accelerator an active banking sector and an endogenous macroprudential policy reaction function We parametrize the model for Luxembourg through a mix of calibration and Bayesian estimation techniques The model features dynamic properties that align with theoretical priors and empirical evidence and displays sensible data matching and forecasting capabilities especially for credit indicators We find that the credit gap which remained positive during COVID 19 amid continued favorable financial conditions and policy support had been closing by mid 2022 Model based forecasts using data up to 2022Q2 and conditional on the October 2022 WEO projections for the Euro area suggest that Luxembourg s business and credit cycles would deteriorate until late 2024 Based on these insights about the current and projected positions in the credit cycle the model can guide policymakers on how to adjust the macroprudential policy stance Policy simulations suggest

that the weights given to measures of credit to GDP and asset price gaps in the macroprudential policy rule should be well calibrated to avoid unwarranted volatility in the policy response Graduate Announcement University of Michigan--Dearborn,2002 **University of Minnesota Bulletin** Minnesota.
