Build A Business Around Your Curiosity: Learn, Build, Share, Sell, Repeat Ahmed Musa, What if your curiosity wasn't a distraction but your greatest business asset This book is your permission slip to stop waiting for clarity and start building with what fascinates you Instead of following someone else's formula you'll discover how to turn your natural interests into powerful income engines without burning out faking expertise or locking yourself into one narrow niche You don't need to have it all figured out You don't need a perfect plan What you need is a loop learn something new build something small share it publicly offer it for sale and repeat That's how momentum builds That's how trust compounds And

that's how modern creators are turning curiosity into profitable businesses without losing themselves in the process. This approach works whether you're just getting started or reimagining your next chapter. It honors the way creative minds naturally work: driven by questions inspired by patterns and fueled by experimentation. You'll learn how to validate ideas by sharing your process, how to grow an audience by inviting them into your learning journey, and how to make money by offering simple, valuable products that emerge from what you've already explored. You don't need to commit to a single topic forever. You just need to commit to the loop: Curiosity leads to learning. Learning leads to building. Building leads to sharing. Sharing leads to sales. Sales fund your next round of curiosity. The old business model says you need to know everything upfront. The new business model says start with what you're curious about and let that be more than enough. This is the book for creative minds ready to turn their questions into income and their interests into impact. Learn. Build. Share. Sell. Repeat.

The Exponential Age Azeem Azhar, 2021-09-07. A bold exploration and call to arms over the widening gap between AI automation and big data and our ability to deal with its effects. 2021 Financial Times Best Book of the Year. We are living in the first exponential age. High-tech innovations are created at dazzling speeds; technological forces we barely understand remake our homes and workplaces; centuries-old tenets of politics and economics are upturned by new technologies. It all points to a world that is getting faster at a dizzying pace. Azeem Azhar, renowned technology analyst and host of the Exponential View podcast, offers a revelatory new model for understanding how technology is evolving so fast and why it fundamentally alters the world. He roots his analysis in the idea of an exponential gap in which technological developments rapidly outpace our society's ability to catch up. Azhar shows that this divide explains many problems of our time, from political polarization to ballooning inequality to unchecked corporate power. With stunning clarity of vision, he delves into how the exponential gap is a near-inevitable consequence of the rise of AI automation and other exponential technologies like renewable energy, 3D printing, and synthetic biology, which loom over the horizon. And he offers a set of policy solutions that can prevent the growing exponential gap from fragmenting, weakening, or even destroying our societies. The result is a wholly new way to think about technology, one that will transform our understanding of the economy, politics, and the future. Azeem is a master at interpreting a dazzling array of trends and illuminating the future. Exponential is a must-read to understand the problems, promise, and paths forward on the exponential journey ahead for us as individuals, businesses, and society. Paul Daugherty, Group Chief Executive Officer, Technology, Accenture. With his experience as a startup entrepreneur, tech investor, innovation executive at big companies, and journalist, Mr. Azhar is well-placed to decrypt these digital trends. He has a knack for interrogating and inverting conventional thinking. *The Economist* **Technologies for Education** Ann E.
