After the Pandemic Randy Whitaker,2022-10-10 Many things define a job seeker experience education first impressions connections passion and the value you might bring to the company you wish to work for For decades the perceived ideal candidate would have all of the above most of the above however a good candidate would have a four year college degree To a great extent an employer still would like someone with a four year college degree However I believe this is changing The need for those who work with their hands and those who are willing to work their way up through the various levels of an organization is becoming more and more desired by companies The time it will take you to earn your degree you could be making a nice living and will have accrued zero debt in the process Plus after working in an industry of your choice something you do have an interest in even a passion for you may be on equal footing with a newly hired college grad based on the four years you have been working in your industry of choice as you continue to work your way up through the company You will find the more value you bring to a company the more they will look to you to assume great responsibility Typically the more responsibility the greater the paycheck What makes this book timely is the fact as COVID 19 winds down we are seeing many labor shortages in many areas and industries Now is the absolute best time to go to an industry experiencing a labor shortage or enter one of the numerous industries researched in this book and get yourself the job you always wanted without the cost and time involved with getting a four year college education I have nothing against getting a degree and there are still many fields where they will always be mandatory however the trades service industries government railroads law enforcement plus many others will welcome you with open arms without the need for a four year degree I hope this book helps

Data Science - Analytics and Applications Peter Haber,Thomas J. Lampoltshammer,Helmut Leopold,Manfred Mayr,2022-03-29 Organizations have moved already from the rigid structure of

classical project management towards the adoption of agile approaches This holds also true for software development projects which need to be flexible to adopt to rapid requests of clients as well to reflect changes that are required due to architectural design decisions With data science having established itself as corner stone within organizations and businesses it is now imperative to perform this crucial step for analytical business processes as well The non deterministic nature of data science and its inherent analytical tasks require an interactive approach towards an evolutionary step by step development to realize core essential business applications and use cases The 4th International Data Science Conference iDSC 2021 brought together researchers scientists and business experts to discuss means of establishing new ways of embracing agile approaches within the various domains of data science such as machine learning and AI data mining or visualization and communication as well as case studies and best practices from leading research institutions and business companies The proceedings include all full papers presented in the scientific track and the corresponding German abstracts as well as the short papers from the student track Among the topics of interest are Artificial Intelligence and Machine Learning Implementation of data mining processes Agile Data Science and Visualization Case Studies and Applications for Agile Data Science Organisationen sind bereits von der starren Struktur des klassischen Projektmanagements zu agilen Ansätzen übergegangen Dies gilt auch für Softwareentwicklungsprojekte die flexibel sein müssen um schnell auf die Wünsche der Kunden reagieren zu können und um Änderungen zu berücksichtigen die aufgrund von Architekturentscheidungen erforderlich sind Nachdem sich die Datenwissenschaft als Eckpfeiler in Organisationen und Unternehmen etabliert hat ist es nun zwingend erforderlich diesen entscheidenden Schritt auch für analytische Geschäftsprozesse durchzuführen Die nicht deterministische Natur der Datenwissenschaft und die ihr innewohnenden analytischen Aufgaben erfordern einen interaktiven Ansatz für eine evolutionäre schrittweise Entwicklung zur Realisierung der wichtigsten Geschäftsanwendungen und Anwendungsfälle Die 4. Internationale Konferenz zur Datenwissenschaft iDSC 2021 brachte Forscher Wissenschaftler und Wirtschaftsexperten zusammen um Möglichkeiten zu erörtern wie neue Wege zur Umsetzung agiler Ansätze in den verschiedenen Bereichen der Datenwissenschaft wie maschinelles Lernen und KI Data Mining oder Visualisierung und Kommunikation sowie Fallstudien und Best Practices von führenden Forschungseinrichtungen und Wirtschaftsunternehmen etabliert werden können Der Tagungsband umfasst alle im wissenschaftlichen Track vorgestellten Volltexte und die Kurzbeiträge aus dem studentischen Track auf Englisch und die dazugehörigen Abstracts auf Deutsch Zu den Themen die sie interessieren gehören unter anderem Künstliche Intelligenz und Maschinelles Lernen Implementierung von Data Mining Prozessen Agile Datenwissenschaft und Visualisierung Fallstudien und Anwendungen für Agile Datenwissenschaft
