New Ai Chatbot For Website For Bloggers:

FROM CODE TO CREATIVITY: THE GENERATIVE AI REVOLUTION Dr. Anish R. Khobragade, 2024-09-09 One important reason why digital technologies are advancing so quickly right now is the emergence of generative AI. We have managed new methods and tools for performing tasks across several sectors with the assistance of this innovation and we have also been able to produce highly innovative and helpful stuff. All the experts agree that AI will have a bigger impact on the economy in the next years. The unprecedented revolution in the area of Artificial Intelligence is the driving force behind these high expectations which are based on the substantial demand for these technologies. A broad range of research suggests that AI will significantly alter our planet's landscape in the years to come. We have witnessed AI's profound impact on people's interactions with recent technological and machines now they can harness this power to propel diverse and adaptable innovations that can keep up with the lightning fast pace of cultural and technological change while also opening up fulfilling new avenues for exploration. The UAE is eager to stay ahead of the curve in terms of new technology so that it can study how to best use generative AI in various domains like education healthcare media advanced sciences and more in accordance with the directives of its wise leadership to prepare for the future. With 100 million users between November 2022 and January 2023 and over one million users in the first five days Chat GPT's launch has drawn an extraordinary turnout. The government of the United Arab Emirates UAE has brought out the Generative Artificial Intelligence Guide in reaction to these changes the document seeks to handle the challenges as well as potential that this technology brings. Data privacy security within the context of these digital breakthroughs is also covered in the book along with numerous prompt models that may be employed to get optimum and effective AI replies.

Augmenting Public Relations David Phillips, 2024-10-21 Augmenting Public Relations examines how existing technologies used in Public Relations PR are being significantly augmented because of the advent of Artificial Intelligence AI. The book describes the opportunities and pitfalls of AI recent and emerging technologies and projections in their development offering an introduction to practitioners on how they too can create their own AI enhanced tools. The developments in augmented virtual and meta reality aided by AI have now become serious contenders for commercial communication and the ability to harness this visual capability is explained in some detail. As is the ability for practitioners to automatically monitor and feed websites using Application Programming Interfaces APIs. The book also considers computer games as a form of communication and the evolving application of games supported by AI. In recent years the PR monitoring industry has deployed AI to search for content of interest to clients across a vast range of media. It throws up huge amounts of data to be managed. The book explores how such resources can be harnessed for intelligence gathering and activity deployment in easy to understand language. The book also covers a range of other activities from brain to computer communication to chatbots including applications used by the Internet of Things Security Issues and Crisis Management and the crucial subject of Ethics. Examining a range of new practices for the PR industry and covering both
