first resource for examining how the Internet affects our definition of who we are and our communication and work patterns. It also examines how normal behavior differs from the pathological with respect to Internet use. The book contains three sections: the first section covers the self in relation to the Internet; the second section explores how the Internet is used to meet new friends and love interests as well as to conduct business; and the final section examines the philosophical ramifications of Internet use and our definitions of reality and consciousness. *Philosophy on the Internet* Prentice-Hall Staff, 1998-06. *Think Like a Human* David Weitzner, 2025-05-13. A new way of thinking that improves how we work, create, and live, empowering readers to outsmart AI, a tool that can never do what humans do. The bedrock on which technology has been built and on which we now make strategic, political, ethical, and even day-to-day decisions, algorithmic thinking is flawed. As we race headlong into a future where we outsource all our problem solving to artificial intelligence, the greatest threat is not superintelligent machinery but too much trust in Big Tech and not enough trust in the power of our own minds. *Think Like a Human* offers a new way forward, what Dr. Weitzner calls artful intelligence, a philosophy that can help each of us solve problems and make better decisions. To think artfully is to approach problem solving not just with our brains but with our hands, eyes, and ears, along with our literal and metaphorical hearts and guts, tapping into the myriad of underutilized cognitive resources distributed throughout our bodies. *Think Like a Human* is a refreshing antidote and reality check to artificial intelligence mania and fear. Cutting through the hype, misinformation, and corporate hustle around AI, this book will inspire you to adopt the artful approach, bringing intuition and emotional intelligence to your work and life.
