Human + Machine, Updated and Expanded Paul R. Daugherty, H. James Wilson, 2024-09-10 AI including generative AI is radically transforming business Are you ready Accenture technology leaders Paul Daugherty and Jim Wilson provide crucial insights and advice to help you meet the challenge Look around you Artificial intelligence is no longer just a futuristic notion It s here right now in software that senses what we need supply chains that think in real time and now generative AI that is radically reshaping work and productivity Twenty first century pioneer companies are already using AI to innovate and grow fast The bottom line is this Businesses that understand how to harness AI can surge ahead Those that neglect it will fall behind Which side are you on In this updated and expanded edition of Human Machine including a new chapter on gen AI Accenture technology leaders Paul Daugherty and Jim Wilson show that the essence of the AI paradigm shift is the transformation of all business processes within an organization whether related to breakthrough innovation everyday customer service or personal productivity habits As humans and smart machines collaborate ever more closely work processes become more fluid and adaptive enabling companies to change them on the fly or completely reimagine them Based on the authors experience and research with fifteen hundred organizations the book reveals how companies are using the new rules of AI to leap ahead on innovation and profitability and what you can do to achieve similar results It describes six entirely new types of hybrid human machine roles that every company must develop and it includes a leader s guide with the five crucial principles required to become an AI fueled business Human Machine provides the missing and much needed management playbook for success in the new age of AI

AI in Health Tom Lawry, 2020-02-05 We are in the early stages of the next big platform shift in healthcare computing Fueled by Artificial Intelligence AI and the Cloud this shift is already transforming the way health and medical services are provided As the industry transitions from static digital repositories to intelligent systems there will be winners and losers in the race to innovate and automate the provision of services Critical to success will be the role leaders play in shaping the use of AI to be less artificial and more intelligent in support of improving processes to deliver care and keep people healthy and productive across all care settings This book defines key technical process people and ethical issues that need to be understood and addressed in successfully planning and executing an enterprise wide AI plan It provides clinical and business leaders with a framework for moving organizations from the aspiration to execution of intelligent systems to improve clinical operational and financial performance

Rational Decisions in Organisations Frédéric Adam, Dorota Kuchta, Stanisław Stanek, 2022-05-30 Managers in organisations must make rational decisions Rational decision making is the opposite of intuitive decision making It is a strict procedure utilising objective knowledge and logic It involves identifying the problem to solve gathering facts identifying options and outcomes analysing them considering all the relationships and selecting the decision Rational decision making requires support methods and software tools The identification of the problem to solve needs methods that would measure and evaluate the

current situation Identification and evaluation of options and analysis of the available possibilities involves analysis and optimisation methods Incorporating intuition into rational decision making needs adequate methods that would translate ideas or observed behaviours into hard data Communication observation and opinions recording is hardly possible today without adequate software Information and data that form the input intermediate variables and the output must be stored managed and made accessible in a user friendly manner Rational Decisions in Organisations Theoretical and Practical Aspects presents selected recent developments in the support of the widely understood rational decision making in organisations illustrated through case studies The book shows not only the variety of perspectives involved in decision making but also the variety of domains where rational decision support systems are needed The case studies present decision making by medical doctors students and managers of various universities IT project teams construction companies banks and small and large manufacturing companies Covering the richness of relationships in which the decisions should and must be taken the book illustrates how modern organisations operate in chains and networks they have multiple responsibilities including social legal business and ethical duties Nowadays managers in organisations can make transparent decisions and consider a multitude of stakeholders and their diverse features incorporating diverse criteria using multiple types and drivers of information and decision making patterns and referring to numerous lessons learned As the book makes clear the marriage of theoretical ideas with the possibilities offered by technology can make the decisions in organisations more rational and at the same time more human
