Taghizadeh-hesary, Naoyuki Yoshino, Chul Ju Kim, Peter J Morgan, Daehee Yoon, 2021-08-03 Successful startups and small businesses can play a significant role in economic growth and job creation. They also contribute to economic dynamism by spurring innovation and injecting competition. Startups are known to introduce new products and services that can create new value in the economy. It is notable that most startups exit within their first ten years and most surviving young businesses do not grow but remain small. Startups and small businesses face several obstacles to their development. Accessing capital is a crucial constraint on their growth. Most startups and small businesses have difficulties getting the funds they need because of their lack of a performance track record and lack of collateral making it difficult for lenders or investors to assess their risk. Besides they are in the early stages of development and face a very high possibility of failure which significantly raises financing and investment risk. Investment in Startups and Small Business Financing provides 12 thematic and case studies on new methods for bringing private investment loans or equity to startups and easing small businesses access to finance debt and capital. The contributors are senior level policy experts and researchers from governments, think tanks, academia and international organizations. The chapters are authored in a policy oriented way to be understandable for the readers with a different background. This book is a precious source for the governments for adopting the right policies to develop small businesses and startups and valuable for the researchers in economics, business and finance.
