Transactions of the American Institute of Electrical Engineers ,1922 Information System Development Process Naveen Prakash, Colette Rolland, Barbara Pernici, 1993 This volume aims to pave the way to a greater understanding of the information system development process Traditionally information systems have been perceived as a slice of real world history This has led to a strong emphasis on the development of conceptual models the requirements specifications of which can readily be expressed However the route to such an expression or the process of development has not received any substantial attention It is now agreed that a study of the development process affords notable benefits Firstly it helps to create an understanding of what a realistic development process is and how it proceeds from an initial specification to its acceptable representation Secondly the nature of guidance that can be provided by the next generation of CASE tools can be substantially improved It can be expected that these tools will cease to be mere drafting aids and consistency checking programs Instead it is likely that they will provide a procreative environment in which the development engineer will play an important role This tool user symbiosis should have a beneficial impact on both the productivity of the developer and on the quality of the product In bringing together researchers and practitioners from such diverse areas as AI Software Engineering Decision Support and Information Systems it is hoped this publication will take the quest to comprehend information system development processes a significant step forwards *Journal of the American Institute of Electrical Engineers* American Institute of Electrical Engineers, 1920 Includes preprints of Transactions of the American Institute of Electrical Engineers ISSN 0096 3860 **The Journal of the Society of Automotive Engineers** ,1923 **Aeronautical Engineering Review** ,1957 **Industrial Development and Manufacturers Record** ,1920 Beginning in 1956 each vol includes as a regular number the Blue book of southern progress and the Southern industrial directory formerly issued separately **The general development of the joint-stock system to 1720** William Robert Scott, 1912
