□ ,2008 *All Deliberate Speed* Charles M. Wollenberg,2023-04-28 In *All Deliberate Speed Segregation and Exclusion in California Schools* 1853 1975 the author explores the long complex history of racial integration and exclusion in California's public schools Beginning with a parent's hopeful statement in 1872 about the positive impact of school integration on racial equality the book examines the enduring struggle to make that vision a reality This historical study delves into California's educational system and its resistance to integration as well as the ways in which schools and courts have both facilitated and obstructed progress toward racial equality The author aims to provide a usable history to frame contemporary debates on issues like busing and ethnic balance within the broader context of past racial and educational dynamics The book also considers California's unique demographics and educational landscape underscoring the state's role as a battleground for integration policies due to its diverse ethnic composition The state has a significant population of minorities including people of Asian Latin American Polynesian Black and Native American descent who have historically faced varying levels of discrimination in education Unlike studies focused on Eastern states this book highlights California's distinct educational challenges and offers a regional perspective on national integration issues The narrative centers on how each ethnic group navigated these challenges actively seeking ways to leverage the educational system for social mobility while facing resistance that led them to turn to the courts for justice Despite the author's personal belief in integration the book refrains from presenting the subject as a clear moral dichotomy Instead it examines the varied motivations behind both integrationist and segregationist stances revealing that intentions range from promoting equal opportunity to preserving community heritage or opposing enforced assimilation The study frames California's educational history as a conflict between universalist ideals of national values and the particularist values of local communities By viewing the ongoing battles for school desegregation as a reflection of deeply rooted beliefs in the power of education and the judiciary the book ultimately underscores the enduring faith that Americans place in these institutions to shape a more equitable society This title is part of UC Press's *Voices Revived* program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 *Voices Revived* makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1976 *Urban Schools, Public Will* Norm Fruchter,2007 In this important book Norm Fruchter argues that our national failure to carry out the Brown mandate has produced segregated urban school systems that fail to educate poor students of color Drawing on a rich array of research and personal experience he examines why urban districts have failed and what must be done to transform our city schools He identifies urban districts as the key actors in this transformation and profiles three school districts that have achieved significant success in closing the achievement gap He also identifies grassroots
