Real-time Image Upscaling with Commonly Available Resources Nathaniel Tovar (Graduate student), 2021 Abstract With the rise of video streaming platforms the need to maximize image quality at the user end while minimizing the amount of data sent has never been higher Compression algorithms are already nearing the limit of their ability to improve thus the only way to significantly decrease the amount of data sent would be to decrease the image resolution on the transmitter side

and upscale the image on the user side The difficulty of this lies in the fact that the users have vastly different resources available to perform said upscaling and normal upscaling does not yield sufficiently high quality images Deep learning has enabled the advent of image super resolution but such solutions take too long to be useful in real time applications Therefore I am proposing a deep learning network that can be run in real time on a single core of a 2 GHz CPU while providing better quality than normal interpolation *The James White Review* ,1990

Yeah, reviewing a books **How To Ai Image Upscaler Tips For High School Students** could add your close connections listings. This is just one of the solutions for you to be successful. As understood, endowment does not suggest that you have fantastic points.

Comprehending as with ease as deal even more than new will present each success. neighboring to, the broadcast as competently as keenness of this How To Ai Image Upscaler Tips For High School Students can be taken as competently as picked to act.
