*Neurocinematics: How the Brain Perceives Audiovisuals* Celia Andreu-Sánchez, Miguel Ángel Martín-Pascual, José M. Delgado-García, 2025-11-27 This Research Topic is part of a series with Neuroscience and the Media Please see the first edition here Understanding how the brain perceives audiovisuals is a burgeoning field within neuroscience often referred to as neurocinematics This area of research is crucial as it provides quantitative and reliable tools for designing media content based on neural responses rather than subjective reports Identifying patterns that link brain activity with audiovisual characteristics whether format or content related can offer profound insights into brain function in response to different stimuli Recent studies have shown that cognitive deficits can become apparent when perceiving audiovisuals highlighting the potential for developing non invasive tools to address these deficits Despite significant advancements there remain gaps in our understanding of how media content impacts brain activity and consequently behavior and cognition This underscores the need for further investigation into the neural mechanisms underlying audiovisual perception This Research Topic aims to expand our knowledge of neurocinematics an interdisciplinary approach to understanding audiovisual perception through the brain activity of spectators The primary objectives include exploring how the brain processes audiovisuals identifying neural patterns associated with different types of media content and understanding the cognitive and physiological responses

elicited by audiovisual stimuli Specific questions to be addressed include How does the brain differentiate between various audiovisual formats What neural mechanisms are involved in the perception of narrative and non narrative content How can this knowledge be applied to address cognitive deficits To gather further insights into the boundaries of neurocinematics we welcome articles addressing but not limited to the following themes Neurocinematics Cognitive neuroscience and the perception of audiovisual content Visual perception of movies Neuroscience methods applied to media content Neurophysiology of media creators Neurophysiology of media viewers Subjective perception of time when watching movies Manuscripts employing techniques that measure the brain activity of viewers such as eye tracking EEG fMRI and fNIRS among others from various approaches are particularly welcome **Byte** ,1990-11 *Coda: Poets & Writers Newsletter* ,1981 Vols for present up dated and additional information to supplement A Directory of American poets **Press Woman** ,1990 **What AI Can Do for You: Use Cases for AI on IBM Z** Makenzie Manna,Diego Cardalliaguet,Mehmet Cuneyt Goksu,Alex Osadchyy,Lih M Wang,Sherry Yu,Poonam Zham,Erica Ross,IBM Redbooks,2022-08-02 Artificial intelligence AI and machine learning ML are talked about as though they are in a distant future That future is here We live in a world where technology is fully integrated with how we live People own smartphones smart wearables smart TVs and so on With the integration of technology into almost every aspect of our everyday lives there is an ever growing massive amount of data coming from each digital interaction This data is the critical fuel powering deep enterprise insights that can be used to expand AI capabilities and infuse those capabilities into mission critical applications and processes to gain a competitive advantage With the relatively novice AI and ML technologies in demand by most industries today there is still confusion around how to most efficiently use these capabilities to realize the most benefits There is a diverse scope of AI and ML solutions ranging from models that aid in medical discoveries to models that detect fraudulent banking behavior to protect consumers and financial institutions from costly financial breaches Adding to the complexity of how AI and ML can help enterprises solve their evolving business demands is the growing number of available tools and product offerings to bring these capabilities to life on the IBM Z platform This IBM Redpaper publication can help you better understand the uniquely advantageous roles AI and IBM Z can play in helping your organization realize your business goals It introduces some of the most critical AI on IBM Z use cases currently being worked on across multiple industries and describes component suggestions with high level reference architectures for the implementation of each use case We cover the following use cases Artificial intelligence for IT operations use cases Data and artificial intelligence operations use cases Use cases for artificial intelligence in chatbots Financial services sector use cases Public sector use cases Healthcare sector use cases Retail and insurance sector use cases This paper is intended for IT architects to understand the integration and components of the solution at a high level and IT management and decision makers to better understand how these AI on IBM Z use cases can be applied to help solve your business problems **AI Magazine** ,1999 *InfoWorld* ,1990 **The Linton**
